Canines Lauryn E. DeGreeff, Craig A. Schultz, 2022-01-31 Detection canines have been utilized throughout the world for
 over a century and while numerous attempts have been made to replicate the canine s ability to detect substances by
 mechanical means none has been as successful The olfactory system is a highly intricate and sophisticated design for

chemical sensing and the olfactory capacity of many animals including canines is considered unmatched by machine due to not only their great sensitivity and superior selectivity but also their trainability and mobility. These unique features have led to the use of such animals as whole animal biosensors. Amplifying the benefits and diminishing the limitations of detection canines interdisciplinary research is crucial to understanding canine olfaction and detection and enhancing this powerful and complex detector. The past 50 years have produced vast advancements in animal behavior training technology to develop canines into more proficient and reliable sensors while scientific research has provided tremendous support to help practitioners better understand how to utilize this powerful sensor. This book assembles a diverse group of authors with expertise in a variety of fields relating to detection canines and the chemical sensing industry including both research and operational perspectives on detection canines. It illustrates how science enhances our understanding of how canines are employed for solving some of the world's leading detection challenges. Design of Demining Machines Dinko

Mikulic, 2012-10-09 In constant effort to eliminate mine danger international mine action community has been developing safety efficiency and cost effectiveness of clearance methods. Demining machines have become necessary when conducting humanitarian demining where the mechanization of demining provides greater safety and productivity. Design of Demining Machines describes the development and testing of modern demining machines in humanitarian demining. Relevant data for design of demining machines are included to explain the machinery implemented and some innovative and inspiring development solutions. Development technologies, companies and projects are discussed to provide a comprehensive estimate of the effects of various design factors and to proper selection of optimal parameters for designing the demining machines. Covering the dynamic processes occurring in machine assemblies and their components to a broader understanding of demining machine as a whole. Design of Demining Machines is primarily tailored as a text for the study of the fundamentals and engineering techniques involved in the calculation and design of demining machines. It will prove as useful resource for engineers, designers, researchers and policy makers working in this field. National Drug Control Strategy United States.

Office of National Drug Control Policy, 1990 **Socio-Economic Impacts of Landmines in Southern Kurdistan** Almas Heshmati, Nabaz T. Khayyat, 2012-12-19 The Kurdistan Region of Iraq has been massively contaminated by landmines and unexploded ordnance. This will continue to be a major obstacle for development and economic growth particularly in the rural border communities. The mines were used systematically by the central Baathist government in its efforts to depopulate the Kurdistan Region and to weaken the Kurds' demands for regional self-determination. This work investigates the magnitude of the landmine problem in the region and the landmine action activities undertaken to rehabilitate, reconstruct and develop the region. In addition to that, this work emphasizes the social, health, educational and economic impacts of landmines as well as the legal consequences. In order to achieve the abovementioned objectives, this work is divided into fifteen chapters. After providing an introduction and background to the landmine problem, the authors discuss the scope of the problem both in the

Kurdistan Region and internationally The methods of dealing with mines and their consequences are reviewed The issues of landmine action impact surveys factors influencing the survey process and mine actions activities are also discussed A comprehensive review of the outcome of the problem of landmines in the Kurdistan Region has been conducted The nature and characteristics of the problems faced by Kurds are discussed in more detailed form by looking at case studies Here the economic social and health impacts of landmines in the region are assessed The issues of the human security and political impacts of landmines are further addressed followed by an assessment of mine action resources and its progress education and various preventive measures Finally a number of policy recommendations are provided to prevent the use of mines in the future and to take legal action against landmine users for clearance rehabilitation and compensation issues **Tactics for Criminal Patrol** Charles Remsberg,1995-01-01 Insider patrol tactics you can start using right now to safely turn ordinary traffic stops into major felony arrests of drug couriers gun traffickers and other violent criminals Brings you step by step the rarely shared techniques of elite officers who are already producing spectacular results while staying alive and legally unscathed Once you learn the secrets of sensory pat downs deception detection strategies for searches and single officer self defense your vehicle stops will never again be the same
