**VARIABLES AND EXPRESSIONS**  
NG.2.A.1.1-12.1.A.2.1-12

*Algebra is the process of using the properties of numbers to manipulate sentences or changing quantities. These quantities are known as variables and are represented using letters to distinguish them from normal numbers. Thus we combine numbers and/or numbers together using arithmetic operations, we get what are known as expressions.*

**Expressions**

*An expression is any combination of numbers and/or variables using addition, multiplication, subtraction, division, and other operations (such as exponents).*

**Example #1:** Rewrite the order of operations to giving the value of each of the following given numerical expressions. The three numbers is calculated in order to ensure basic models school number concepts.

Ex:  $3 \cdot 2 + 7$       Ex:  $8 - \frac{2}{3} \cdot 6 + 24 + 6$       Ex:  $4(8 - 12) - 7(4 + 2)$

Ex:  $\frac{3^2 + 4 \cdot 2}{2 + 3}$       Ex:  $25 + 2(36 + 4)$       Ex:  $\frac{3^2 + 4 \cdot 2}{2 + 3}$

*Knowing the order of operations is essential when we must give expressions that contain only numbers so that that number variables, you need to be able to "read" an expression in established order to bring them to the variable.*

**Example #2:** If the letter is represents some unknown quantity, explain the calculation/operations that each of the following expressions represent. Write both the operations and the order in which they occur.

Ex:  $3x + 4$       Ex:  $\frac{3x + 4}{2}$       Ex:  $4x^2 + 9$

**Teaching to the Math Common Core State Standards** F. D. Rivera, 2015-06-17 This is a methods book for preservice middle level majors and beginning middle school teachers It takes a very practical approach to learning to teach middle school mathematics in an emerging Age of the Common Core State Standards The Common Core State Standards in Mathematics CCSSM is not meant to be the official mathematics curriculum it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the Grade 5 through Grade 8 and traditional pathway Algebra I portions of the CCSSM first with issues in content practice assessment learning teaching and classroom management pursued next and in that order In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content practice learning teaching and assessment The Common Core state content standards which pertain to mathematical knowledge skills and applications have been carefully crafted so that they are teachable learnable coherent fewer clearer and higher The practice standards which refer to institutionally valued mathematical actions processes and habits have been conceptualized in ways that will hopefully encourage all middle school students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation Thus in the CCSSM proficiency in content alone is not sufficient and so does practice without content which is limited Content and practice are both equally important and thus must come together in teaching learning and assessment in order to support authentic mathematical understanding This blended multisourced text is a getting smart book It prepares preservice middle level majors and beginning middle school teachers to work within the realities of accountable pedagogy and to develop a proactive disposition that is capable of supporting all middle school students in order for them to experience growth in mathematical understanding that is necessary for high school and beyond including future careers Common Core Mathematics in a PLC
