[Provide a description of the document organization.]

2 METHODOLOGY

[Describe the overall approach used in the determination of the modeling method(s) so non-technical readers can convey.]

3 FUNCTIONAL REQUIREMENTS

4.1 Context

[Provide a context diagram of the system, with explanation of a system refers to the connections and relationships environment.]

Exhibit 2 - Generic Context Diag

4.2 User Requirements

[Provide requirements of the system, user or business, to classes/categories of users. Provide the type of user characteristics of each set of users. List the functional req user requirement. As the functional requirements are de functional requirements are traced to the user requirement functional requirements is not mandatory in the traceability parent requirements are already traced to them.

User requirement information can be in text or process flow class that shows what inputs will initiate the system functionality.

what outputs are expected to be generated by the system. The scenarios should be comprehensive, to the extent that all user types and all major functions are covered. Give each user requirement a unique number. Typically, user requirements have a numbering system that is separate from the functional requirements. Requirements may be labeled with a leading "U" or other label indicating user requirements.]

4.3 Data Flow Diagrams

[Decompose the context level diagrams to determine the functional requirements. Data flow diagrams should be decomposed down to the functional primitive level. These diagrams are further decomposed during design.]

4.4 Logical Data Model/Data Dictionary

[Create the initial Logical Data Model. Describe data requirements by providing data entities, decomposition, and definitions in a data dictionary. The data requirements describe the business data needed by the application system. Data requirements do not describe the physical database and are not at the level of identifying field names.]

4.5 Functional Requirements

[List the functional requirements of the system.]

4.5.1 Functional Requirements Group 1

[List the functional requirements for each functional requirements group.]

Exhibit 4 - Sample Requirements Group 1

Section/ Requirement ID	Requirement Definition
FR1.0	The system shall [parent requirement group 1].
FR1.1	The system shall [child parent requirement].
FR1.1.1	The system shall [child requirement].
FR1.1.2	The system shall [child requirement].

4.5.2 Functional Requirements Group 2, Etc.

5 OTHER REQUIREMENTS

[Describe the non-behavioral requirements.]

5.1 Interface Requirements

[Describe the user interfaces that are to be implemented by the system.]

Agent Supported Cooperative Work Yiming Ye, E. Churchill, 2012-12-06 Improvements in computer networking have heralded great expectations for computer mediated distributed work However experience has revealed that as information flow improves a central problem for distributed workers is the administration management and control of that information Research into Computer Supported Cooperative Work CSCW investigates design methods and technologies for the support of collaboration communication and coordination of distributed group work both within and among organizations In tandem with this focus on the support of distributed communication and collaboration there have been exciting developments in the fields of Intelligent Agents and Distributed Artificial Intelligence DAI notably in the concepts theories and deployment of intelligent agents as a means of distributing computer based problem solving expertise The paradigm of multi agent systems forms a proposed basis for the design of CSCW architectures the support of CSCW operations and for addressing some of the problems of cooperative working The application of a multi agent approach to CSCW makes information exchange among the participants easier by delivering support to the participants assisting workflows and procedures and providing convenient user interfaces to CSCW systems Furthermore the ideas inherent in such an approach are also applicable to other domains such as support for interactive learning Organizations that seek to exploit the advantages offered through CSCW will benefit from the integration of agents in the management and use of their corporate knowledge especially with the advancement of wired or wireless networking pervasive computing and other
