Domestication Gone Wild Heather Anne Swanson, Marianne Elisabeth Lien, Gro B. Ween, 2018-09-27 The domestication of plants and animals is central to the familiar and now outdated story of civilization's emergence Intertwined with colonialism and imperial expansion the domestication narrative has informed and justified dominant and often destructive practices Contending that domestication retains considerable value as an analytical tool the contributors to *Domestication Gone Wild* reengage the concept by highlighting sites and forms of domestication occurring in unexpected and marginal sites from Norwegian fjords and Philippine villages to British falconry cages and South African colonial townships Challenging idioms of animal husbandry as human mastery and progress the contributors push beyond the boundaries of farms fences and cages to explore how situated relations with animals and plants are linked to the politics of human difference and conversely how politics are intertwined with plant and animal life Ultimately this volume promotes a novel decolonizing concept of domestication that radically revises its Euro and anthropocentric narrative Contributors Inger Anneberg Natasha Fijn Rune Flikke Frida Hastrup Marianne Elisabeth Lien Knut G Nustad Sara Asu Schroer Heather Anne Swanson Anna Lowenhaupt Tsing Mette Vaarst Gro B Ween Jon Henrik Ziegler Remme

The Boy Crisis Warren Farrell, John Gray, 2018-03-13 What is the boy crisis It's a crisis of education Worldwide boys are 50 percent less likely than girls to meet basic proficiency in reading math and science It's a crisis of mental health ADHD is on the rise And as boys become young men their suicide rates

go from equal to girls to six times that of young women It s a crisis of fathering Boys are growing up with less involved fathers and are more likely to drop out of school drink do drugs become delinquent and end up in prison It s a crisis of purpose Boys old sense of purpose being a warrior a leader or a sole breadwinner are fading Many bright boys are experiencing a purpose void feeling alienated withdrawn and addicted to immediate gratification So what is The Boy Crisis A comprehensive blueprint for what parents teachers and policymakers can do to help our sons become happier healthier men and fathers and leaders worthy of our respect

Psychomotor Symptomatology in Psychiatric Illnesses Manuel Morrens, Sebastian Walther, 2015-12-10 Psychomotor symptoms are those symptoms that are characterized by deficits in the initiation execution and monitoring of movements such as psychomotor slowing catatonia neurological soft signs NSS reduction in motor activity or extrapyramidal symptoms EPS These symptoms have not always received the attention they deserve although they can be observed in a wide range of psychiatric illnesses including mood disorders psychotic disorders anxiety disorders pervasive developmental disorders and personality disorders Nevertheless these symptoms seem to have prognostic value on clinical and functional outcome in several pathologies In the late 19th century the founding fathers of modern psychiatry including Kahlbaum Wernicke Kraepelin and Bleuler had a strong focus on psychomotor abnormalities in their description and definitions of psychiatric illnesses and systematically recognized these as core features of several psychiatric pathologies Nevertheless emphasis on these symptoms has reduced substantially since the emergence of psychopharmacology given the association between antipsychotics or antidepressants and medication induced motor deficits This has resulted in the general idea that most if not all psychomotor deficits were merely side effects of their treatment rather than intrinsic features of the illness Yet the last two decades a renewed interest in these deficits can be observed and has yielded an exponential growth of research into these psychomotor symptoms in several psychiatric illnesses This recent evolution is also reflected in the increased appreciation of these symptoms in the DSM 5 As a result of this increased focus new insights into the clinical and demographical presentation the etiology the course the prognostic value as well as treatment aspects of psychomotor symptomatology in different illnesses has emerged Still many new questions arise from these findings This research topic is comprised of all types of contributions original research reviews and opinion piece with a focus on psychomotor symptomatology in a psychiatric illness especially research focusing on one or more of the following topics the clinical presentation of the psychomotor syndrome the course through the illness the diagnostical specificity of the syndrome the underlying neurobiological or neuropsychological processes new assessment techniques pharmacological or non pharmacological treatment strategies

Pertussis Pejman Rohani, Samuel Scarpino, 2018-12-06 Pertussis or whooping cough is a respiratory disease caused primarily by infection with the bacterium *Bordetella pertussis* It remains among the leading causes of death amongst vaccine preventable diseases worldwide and recent years have seen its alarming re emergence in many regions including the U S and much of Europe despite sustained high levels of vaccine coverage The

causes of the resurgence remain contentious in part due to inherent complexities of the pathogen's biology in part due to pronounced variation in the treatment and prevention strategies between different countries and regions and in part due to long standing disagreement amongst scientific researchers studying pertussis This edited volume brings together expert knowledge from disparate fields with the overall aim of synthesizing the current understanding of this critically important global pathogen

Breaking the cycle: attacking the malaria parasite in the liver Ute Frevert, Urszula Krzych, Thomas L. Richie, 2016-01-06 Despite significant progress in the global fight against malaria this parasitic infection is still responsible for nearly 300 million clinical cases and more than half a million deaths each year predominantly in African children less than 5 years of age The infection starts when mosquitoes transmit small numbers of parasites into the skin From here the parasites travel with the bloodstream to the liver where they undergo an initial round of replication and maturation to the next developmental stage that infects red blood cells A vaccine capable of blocking the clinically silent liver phase of the Plasmodium life cycle would prevent the subsequent symptomatic phase of this tropical disease including its frequently fatal manifestations such as severe anemia acute lung injury and cerebral malaria Parasitologists immunologists and vaccinologists have come to appreciate the complexity of the adaptive immune response against the liver stages of this deadly parasite Lymphocytes play a central role in the elimination of Plasmodium infected hepatocytes both in humans and animal models but our understanding of the exact cellular interactions and molecular effector mechanisms that lead to parasite killing within the complex hepatic microenvironment of an immune host is still rudimentary Nevertheless recent collaborative efforts have led to promising vaccine approaches based on liver stages that have conferred sterile immunity in humans the University of Oxford's Ad prime MVA boost vaccine the Naval Medical Research Center's DNA prime Ad boost vaccine Sanaria Inc's radiation attenuated whole sporozoite vaccine and Radboud University Medical Centre's and Sanaria's derived chemoprophylaxis with sporozoites vaccines The aim of this Research Topic is to bring together researchers with expertise in malariology immunology hepatology antigen discovery and vaccine development to provide a better understanding of the basic biology of Plasmodium in the liver and the host's innate and adaptive immune responses Understanding the conditions required to generate complete protection in a vaccinated individual will bring us closer to our ultimate goal namely to develop a safe scalable and affordable malaria vaccine capable of inducing sustained high level protective immunity in the large proportion of the world's population constantly at risk of malaria

Banking on Equality Supriti Bezbaruah, 2015-03-24 It may well be surprising to say that the world should look to India as a model of gender equality India's banking sector proves the exception with several women reaching the highest positions in India's top banks including the country's largest bank Based on interviews and surveys of bank employees in India's National Capital Region this book looks at what lies behind the media rhetoric and provides a systematic analysis of patterns of and responses to gender inequality in the banking sector in India The book uncovers how gender discrimination still persists in the banking

sector albeit in covert forms Through a comparison of nationalized Indian private and foreign banks the book demonstrates how the impact of laws local cultural norms and gendered workplace practices are mediated through different organizational forms in these different types of banks to create varied experiences of gender inequality The book is one of the first books to provide a thorough in depth analysis of women s employment in the Indian banking sector currently an under researched area

The Meritocracy Trap Daniel Markovits, 2019 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people
