

Exterior angles of polygons

The exterior angles of **any** polygon will always add up to 360° .

This is true for both regular and non-regular polygons.

Example

Here is a pentagon. Its exterior angles are shown in red.

They all add to make 360° .

$$98 + 62 + 53 + 73 + 74 = 360 \checkmark$$

Regular polygons

Exterior angles of regular polygons are also all equal.

Divide 360 by the number of sides to find the exterior angles.

$$\text{Exterior angles} = \frac{360}{\text{number of sides}}$$

Infinite Geometry Polygons And Angles Work And Answers:

Embracing the Beat of Term: An Mental Symphony within **Infinite Geometry Polygons And Angles Work And Answers**

In some sort of eaten by screens and the ceaseless chatter of instantaneous connection, the melodic elegance and emotional symphony developed by the prepared word usually diminish in to the back ground, eclipsed by the constant noise and disruptions that permeate our lives. Nevertheless, situated within the pages of **Infinite Geometry Polygons And Angles Work And Answers** a charming fictional prize overflowing with raw emotions, lies an immersive symphony waiting to be embraced. Constructed by an outstanding composer of language, that charming masterpiece conducts viewers on a mental journey, well unraveling the concealed melodies and profound impact resonating within each cautiously constructed phrase. Within the depths of the moving examination, we will explore the book is main harmonies, analyze their enthralling publishing style, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
