Benacchio lent me a book by Paul de Kruif The Microbe Hunters and I remained fascinated by infectious diseases I was
intrigued by the potency of virulent bacteria which are constantly trying to invade our bodies and often overcome what today
we call innate and adoptive immunity Indeed shortly after that I was struck by his tragic death due to peritonitis Later while
studying medicine although medical knowledge in the 1950s was almost primordial compared with today I soon realised how
the various biological systems were wonderfully organised but at the same time frail and how our life could end in a few
minutes Slowly it became obvious that our wellness was the result of a dynamic and very unstable equilibrium between
health and disease This unstable equilibrium could be broken forever if the body's response could not reverse the
pathological state I stuck a sort of poster on the wall of my room with these three words and connecting arrows HEALTH
DISEASE DEATH As I don't believe in another world after death it became obvious to me that we should make every possible
effort not only to delay death but to try always to shift the equilibrium to the left In this book I will try to show that this can

be achieved as a last resort even with ozonotherapy Britannica Concise Encyclopedia Encyclopaedia Britannica, Inc.,2008-05-01 Britannica Concise Encyclopedia is the perfect resource for information on the people places and events of yesterday and today Students teachers and librarians can find fast facts combined with the quality and accuracy that have made Britannica the brand to trust A tool for both the classroom and the library no other desk reference can compare
