Social Epistemology Alvin Goldman, Dennis Whitcomb, 2011-02-11 What if anything justifies us in believing the testimony of others How should we react to disagreement between ourselves and our peers and to disagreement among the experts when we ourselves are novices Can beliefs be held by groups of people in addition to the people composing those groups And if so how should groups go about forming their beliefs How should we design social systems such as legal juries and scientific research sharing schemes to promote knowledge among the people who engage in them When different groups of people judge different beliefs to be justified how can we tell which groups are correct These questions are at the heart of the vital discipline of social epistemology The classic articles in this volume address these questions in ways that are both cutting edge and easy to understand This volume will be of great interest to

scholars and students in epistemology

Forensic Criminology Wayne Petherick, Brent E. Turvey, Claire E. Ferguson, 2009-07-30 Forensic Criminology gives students of criminology and criminal justice an introduction to the forensic realm and the applied forensic issues they will face when working cases within the justice system It effectively bridges the theoretical world of social criminology with the applied world of the criminal justice system While most of the competing textbooks on criminology adequately address the application and the social theory to the criminal justice system the vast majority do not include casework or real world issues that criminologists face This book focuses on navigating casework in forensic contexts by case working criminologists rather than broad social theory It also allows criminology criminal justice instructors outside of the forensic sciences the ability to develop and instruct a core course that might otherwise be considered beyond their expertise or in conflict with forensic courses taught in chemistry biology or medical programs at their institutions because of its focus on criminology and criminal justice careers With its practical approach this textbook is well suited for forensic criminology subjects being taught and developed in law criminology and criminal justice programs around the world Approaches the study of criminology from an applied standpoint moving away from the purely theoretical Contains relevant and contemporary case examples to demonstrate the application of forensic criminology Provides an integrated philosophy with respect to criminology forensic casework criminal investigations and the law Useful for students and professionals in the area of criminology criminal justice criminal investigation forensic science and the law

Blind Injustice

Mark Godsey, 2019-02-05 In this unprecedented view from the trenches prosecutor turned champion for the innocent Mark Godsey takes us inside the frailties of the human mind as they unfold in real world wrongful convictions Drawing upon stories from his own career Godsey shares how innate psychological flaws in judges police lawyers and juries coupled with a tough on crime environment can cause investigations to go awry leading to the convictions of innocent people In *Blind Injustice* Godsey explores distinct psychological human weaknesses inherent in the criminal justice system confirmation bias memory malleability cognitive dissonance bureaucratic denial dehumanization and others and illustrates each with stories from his time as a hard nosed prosecutor and then as an attorney for the Ohio Innocence Project He also lays bare the criminal justice system s internal political pressures How does the fact that judges sheriffs and prosecutors are elected officials influence how they view cases How can defense attorneys support clients when many are overworked and underpaid And how do juries overcome bias leading them to believe that police and expert witnesses know more than they do about what evidence means This book sheds a harsh light on the unintentional yet routine injustices committed by those charged with upholding justice Yet in the end Godsey recommends structural procedural and attitudinal changes aimed at restoring justice to the criminal justice system
