Subcommittee on Early Childhood, Youth, and Families, 2000 *Improving Math and Science Teaching* Kay McKinney, 1993 A 1992 conference on mathematics and science teaching focused on two specific topics enhanced professional development for educators and better instructional materials for the classroom Teachers members of Congress governors teacher educators professors researchers and policymakers shared what they believed was needed to be done to improve mathematics and science education in the United States This booklet reports the views of the participants and the general consensus of the conference regarding changes needed in the education system The concepts of systemic reform in education and the setting of national standards as exemplified by the National Council of Teachers of Mathematics are discussed in section 1 The second section discusses the necessity of providing all children with an opportunity to learn mathematics and science The third section reports the participants views emphasizing courses that teach mathematics and science for understanding The fourth section discusses the necessity to prepare teachers of math and science to higher standards of skill and knowledge Extensive professional development to help practicing teachers enhance their skills is suggested The fifth section examines the need for the development of better instructional materials for the mathematics and science classroom Finally 20 recommendations in the following 4 themes are reported 1 standards 2 improving mathematics and science teaching 3 instructional materials and 4 systemic change A list of presenters and demonstrators and a statement of principles on school reform in mathematics and science are provided MDH *Congressional Record* Congress, 1990 **Next Steps for TIMSS** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Board on International Comparative Studies in Education, 1999-02-01 Now that the initial results of The Third International Mathematics and Science Study TIMSS have been released the Board on International Comparative Studies in Education BICSE has turned its attention to what happens next The TIMSS data are potentially useful to researchers policy makers practitioners and others interested in evidence regarding factors that influence student learning But although the study has produced a remarkable volume of intriguing data it is by no means complete Scholarly review of the initial data evaluations of claims based on the

data and follow up secondary analysis based on the primary findings are all integral parts of a study of this magnitude but the bulk of this very important work has not yet begun Because of the board s serious concern that this necessary work has not been undertaken or funded it held a workshop on June 17 and 18 1998 to explore different perspectives on possible next steps The workshop was an invaluable opportunity for the board to explore issues and questions it has addressed over the years and to solidify its thinking about many of them Because the board is convinced of the importance of moving forward with the TIMSS data it presents in this report both recommendations as to what ought to be done and many of the innovative specific ideas that emerged from the workshop These recommendations reflect the board s conviction based on its many years of involvement with and deliberations about TIMSS that this study is an extremely rich resource for the policy scholarly and practice communities and that all of these groups have a responsibility to take full advantage of it The recommendations and discussion in this report are intended to assist both researchers and funders who are considering further work with TIMSS and a broader audience of researchers policy makers practitioners and others who have followed the TIMSS results and are eager to use them This report is in a sense the culmination of many years of effort for the board
