Disaster and Human History Benjamin Reilly, 2022-03-31 Human history is periodically punctuated by natural disasters from Vesuvius eruption to the modern day Covid 19 pandemic. Volcanoes have buried entire cities, earthquakes have reduced structures to smoldering ruins. Floods and cyclones have wreaked havoc on river valleys and coastlines and desertification and climate change have weakened society's underpinnings. Death tolls are often escalated by starvation and illness which frequently occur in tandem. This second edition assesses natural disasters on human society and the effect of strategies developed to reduce their impact. This book addresses the interconnectivity of disaster and human responsibility through 23 updated case studies including a new chapter on the 2011 T hoku tsunami and the ensuing Fukushima nuclear disaster.
