Poon, Beth Ann O'Brien, Anne Rifkin-Graboi, 2022-04-06 This book presents a holistic view of child development that emphasises on being mindful of the child as well as his/her environment It presents a history of the development of the early childhood education sector in Singapore This book consolidates the more recent research work that has been done in early childhood education specifically by researchers from the National Institute of Education Singapore It discusses topics focusing on child development and education teacher training and wellbeing and the development of culturally appropriate assessment The content of this book centers around the child with a consideration of influences in the environment that can impact child development *Essentials of Public Health Management* L. Fleming Fallon (Jr.), Eric Zgodzinski, 2012 Written for both professionals and students *Essentials of Public Health Management* is a practical nontheoretical reference that will prepare the reader for the hands-on management and daily operations of a complex public health department or agency Magnetic Appeal Kelly Joyce, 2010-12-15 Magnetic Resonance Imaging not so long ago a diagnostic tool of last resort has become pervasive in the landscape of consumer medicine Images of the forbidding tubes with their promises of revelation surround us in commercials and on billboards *Magnetic Appeal* offers an in-depth exploration of the science and culture of MRI examining its development and emergence as an imaging technology its popular appeal and acceptance and its current use in health care Understood as modern and uncontroversial by health care professionals and in public discourse the importance of MRI or its supposed infallibility has rarely been questioned In *Magnetic Appeal* Kelly A Joyce shows how MRI technology grew out of serendipitous circumstances and was adopted for reasons having little to do with patient safety or evidence of efficacy Drawing on interviews with physicians and MRI technologists as well as ethnographic research conducted at imaging sites and radiology conferences Joyce demonstrates that current beliefs about MRI draw on cultural ideas about sight and technology and are reinforced by health care policies and insurance reimbursement practices Moreover her unsettling analysis of physicians and technologists' work practices lets readers consider that MRI scans do not reveal the truth about the body as is popularly believed nor do they always lead to better outcomes for patients Although clearly a valuable medical technique MRI technology cannot necessarily deliver the health outcomes ascribed to it *Magnetic Appeal* also addresses broader questions about the importance of medical imaging technologies in American culture and medicine These technologies which include ultrasound X-ray and MRI are part of a larger trend in which visual representations have become central to American health identity and social relations *Posthumanist Learning* Cathrine Hasse, 2020-01-03 In this text Hasse presents a new

inclusive posthuman learning theory designed to keep up with the transformations of human learning resulting from new technological experiences as well as considering the expanding role of cyborg devices and robots in learning This ground breaking book draws on research from across psychology education and anthropology to present a truly interdisciplinary examination of the relationship between technology learning and humanity Posthumanism questions the self evident status of human beings by exploring how technology is changing what can be categorised as human In this book the author applies a posthumanist lens to traditional learning theory challenging conventional understanding of what a human learner is and considering how technological advances are changing how we think about this question Throughout the book Hasse uses vignettes of her own research and that of other prominent academics to exemplify what technology can tell us about how we learn and how this can be observed in real life settings Posthumanist Learning is essential reading for students and researchers of posthumanism and learning theory from a variety of backgrounds including psychology education anthropology robotics and philosophy
