Phase Media James Ash, 2017-12-14 In *Phase Media* James Ash theorizes how smart objects understood as Internet connected and sensor enabled devices are altering users experience of their environment Rather than networks connected by lines of transmission smart objects generate phases understood as space times that modulate the spatio temporal intelligibility of both humans and non humans Examining a range of objects and services from the Apple Watch to Nest Cam to Uber Ash suggests that the modulation of spatio temporal intelligibility is partly shaped by the commercial logics of the industries that design and manufacture smart objects but can also exceed them

Drawing upon the work of Martin Heidegger Gilbert Simondon and Bruno Latour Ash argues that smart objects have their own phase politics which offer opportunities for new forms of public to emerge Phase Media develops a conceptual vocabulary to contend that smart objects do more than just enabling a world of increased corporate control and surveillance as they also provide the tools to expose and re order the very logics and procedures that created them **ECIAIR 2019 European Conference on the Impact of Artificial Intelligence and Robotics** Dr Paul Griffiths ,Dr. Mitt Nowshade Kabir ,2019-10-31 Research Methods Kirsty Williamson,Graeme Johanson,2017-11-27 Research Methods Information Systems and Contexts Second Edition presents up to date guidance on how to teach research methods to graduate students and professionals working in information management information science librarianship archives and records and information systems It provides a coherent and precise account of current research themes and structures giving students guidance appreciation of the scope of research paradigms and the consequences of specific courses of action Each of these valuable sections will help users determine the relevance of particular approaches to their own questions The book presents academics who teach research and information professionals who carry out research with new resources and guidance on lesser known research paradigms Provides up to date knowledge of research methods and their applications Provides a coherent and precise account of current research themes and structures through chapters written by authors who are experts in their fields Helps students and researchers understand the range of quantitative and qualitative approaches available for research as well as how to make practical use of them Provides many illustrations from projects in which authors have been involved to enhance understanding Emphasises the nexus between formulation of research question and choice of research methodology Enables new researchers to understand the implications of their planning decisions

Human Factors and Ergonomics: Syllabus for Indian Universities Vivek Kant, Prathamesh Bachche, Rammohan Maikala,2024-05-06 As India moves towards the Vision 2047 in a quest for a better future there is a growing need for the design of technology and infrastructure to enable well being safety and productivity for Indians Human Factors and Ergonomics is one discipline that supports the well being of people in terms of design maintenance management regulation and governance of technology Due to the lack of disciplinary programs that address the totality of the discipline there is a need for capacity building in the academic sector for training the next generation of practitioners This sample syllabus while covering the breadth of the discipline also provides a foundation for Indian universities to fulfil the requirements of Human Factors and Ergonomics This syllabus can be creatively adapted to suit specific master s programs in science engineering technology and design This syllabus provides a basis for a holistic academic program that supports the next generation of learners in India *On the Cognitive, Ethical, and Scientific Dimensions of Artificial Intelligence* Don Berkich,Matteo Vincenzo d'Alfonso,2019-01-28 This edited volume explores the intersection between philosophy and computing It features work presented at the 2016 annual meeting of the International Association for Computing and Philosophy The 23

contributions to this volume neatly represent a cross section of 40 papers four keynote addresses and eight symposia as they cut across six distinct research agendas The volume begins with foundational studies in computation and information epistemology and philosophy of science and logic The contributions next examine research into computational aspects of cognition and philosophy of mind This leads to a look at moral dimensions of man machine interaction as well as issues of trust privacy and justice This multi disciplinary or better yet a disciplinary investigation reveals the fruitfulness of erasing distinctions among and boundaries between established academic disciplines This should come as no surprise The computational turn itself is a disciplinary and no former discipline whether scientific artistic or humanistic has remained unchanged Rigorous reflection on the nature of these changes opens the door to inquiry into the nature of the world what constitutes our knowledge of it and our understanding of our place in it These investigations are only just beginning The contributions to this volume make this clear many encourage further research and end with open questions
