Resources in Education, 1996-07 **Children's Books In Print 1998** Bowker Editorial Staff, R R Bowker Publishing, Bowker, 1998 *Girls Have Academic Advantages and So Do Boys* Jodie Fonseca, Laiba Bahrawar, Margaret M. Dubeck, Yasmin Sitabkhan, Christopher Cummiskey, Devanshi Unadkat, 2023-05-15 This paper contains a new analysis of gender differences in early grade reading and mathematics outcomes in 19 USAID funded studies over the past decade from 14 locations in Africa Asia Latin America and the Middle East The paper addresses gaps in the literature related to learning patterns for girls and boys in lower and

middle income countries and in early primary school We analyzed the results from reading and mathematics assessments in grades 2 and 3 including differences in oral reading fluency ORF and quantitative comparison scores between boys and girls as well as differences in score distributions by gender In line with results from assessments in upper grades and in wealthier countries we found that girls consistently outperformed boys in reading In mathematics boys slightly outperformed girls although the differences were typically not large Global experience has shown that patterns in poor performance become more entrenched the further learners progress through the grades suggesting that early interventions for boys in reading and girls in mathematics could have long term benefits At the same time both girls and boys typically score below expectations in the two subjects across countries necessitating targeted strategies to improve outcomes for both genders early in their educational trajectories *Comprehensive Dissertation Index* ,1984 **Higher grounds** Patience Adjekai Sowa, PhD,Rachel Jordan,Wendi Ralaingita,Benjamin Piper,2021-05-23 To address chronically low primary school completion rates and the disconnect between learners skills at the end of primary school and the skills learners need to thrive in secondary school identified in many low and middle income countries more investment is needed to improve the quality of teaching and learning in upper primary grades Accordingly we provide guidelines for improving five components of upper primary education 1 In service teacher professional development and pre service preparation to improve and enhance teacher quality 2 a focus on mathematics literacy and core content area subjects 3 assessment for learning 4 high quality teaching and learning materials and 5 positive school climates We provide foundational guiding principles and recommendations for intervention design and implementation for each component Additionally we discuss and propose how to structure and design pre service teacher preparation and in service teacher training and ongoing support fortified by materials design and assessment to help teachers determine where learners are in developmental progressions move learners towards mastery and differentiate and support learners who have fallen behind We provide additional suggestions for integrating a whole school climate curriculum social emotional learning and school related gender based violence prevention strategies to address the internal and societal changes learners often face as they enter upper primary
