**Financial Management [Revised Edition]** John Smeur, 2019-08-05 This book introduces key concepts and methods in business financial management. It consists of two parts. Part one is structured around start up investments and key financing decisions facing entrepreneurs during their first year in business. The instruments examined include the investment budget, financing plan, the opening balance sheet, financial planning for profits and liquidity, the closing balance sheet, and a complete treatment of ratio analysis. Part two is about cost prices, budgeting, and variance analysis, profit calculation methods, and break even point, and finally calculations of the returns to alternative investment options. All of these subjects are treated in an accessible stepwise manner and are accompanied with illuminating examples. The combination of theoretical rigor and simple explanations makes the present volume indispensable for both students and entrepreneurs. **Educart CBSE Class 12**
