Lyric as Comedy Calista McRae,2020-10-15 A poet walks into a bar In *Lyric as Comedy* Calista McRae explores the unexpected comic opportunities within recent American poems about deeply personal often embarrassing experiences Lyric poems she finds can be surprising sites of a shifting unruly comedy as seen in the work of John Berryman Robert Lowell A R Ammons Terrance Hayes Morgan Parker Natalie Shapero and Monica Youn *Lyric as Comedy* draws out the ways in which key American poets have struggled with persistent expectations about what expressive poetry can and should do McRae reveals how the modern lyric rather than bestowing order on the poet's thoughts and

emotions can center on impropriety and confusion formal breakage and linguistic unruliness and self observation and self staging The close readings in Lyric as Comedy also provide new insight into the theory and aesthetics of comedy taking in the indirect glancing comic affordances of poetry In doing so McRae captures varieties of humor that do not align with traditional terms centering abjection and pleasure as facets of contemporary lyric practice *Medicine: A*

Refining Prevention: Genetic and Epigenetic Contributions Steven Beach, Jessica McDermott Sales, 2016-04-11 Currently most prevention efforts are famed as universal interventions However despite the demonstrated efficacy of many prevention programs variability in response is the rule with some participants responding very little and others accounting for the bulk of the positive impact of the program Better understanding the processes associated with better and worse response to prevention is a critical first step in refining and adapting existing programs or alternatively designing new prevention programs with enhanced outcomes Because vulnerabilities to substance use emotional problems risky sexual behavior and other behavioral problems are influenced by a combination of environmental genetic and epigenetic factors mediated in part through psychological processes Kreek et al 2005 Rutter et al 2006 the study of genetic and epigenetic vulnerability and susceptibility factors provides an important starting point for efforts to address this critical need A growing body of research on differential genetic susceptibility indicates that efforts to enhance prevention impact may benefit from consideration of the contribution of individual genetic differences to treatment response Brody et al 2013 In addition the recent expansion of genetic research to include a focus on epigenetic change provides considerable promise for the development of indicated prevention and individually tailored prevention efforts However before this promise can be realized a number of theoretical and practical challenges remain Thus through this special section we propose to provide a foundation for a new era of prevention research

in which the principles of prevention science are combined with genomic science In the current special section we will bring together authors to deal with genetic and epigenetically driven processes relevant to depression substance abuse and sexual risk taking Together they will comment on and provide data relevant to assessment research and statistical methods development of biomarkers and implementation strategies with disadvantaged and high risk populations The papers will help to inform the development of a new generation of prevention programs that go beyond universal programs and sensitively target key processes while providing greater precision regarding prediction of population level impact Brody GH Beach SRH Hill KG Howe GW Prado G Fullerton SM 2013 Using genetically informed randomized prevention trials to test etiological hypotheses about child and adolescent drug use and psychopathology American Journal of Public Health 103 Suppl 1 S19 24 Doi 10 2105 AJP 2012 301080 Kreek MJ Nielsen DA Butelman ER LaForge KS 2005 Genetic influences on impulsivity risk taking stress responsiveness and vulnerability to drug abuse and addiction Nature Neuroscience 8 1450 1457 Rutter M Moffitt TE Caspi A 2006 Gene environment interplay and psychopathology Multiple varieties but real effects Journal of Child Psychology and Psychiatry 47 226 261
