Ecological Forest Management Jerry F. Franklin,K. Norman Johnson,Debora L. Johnson,2018-03-19 Fundamental changes have occurred in all aspects of forestry over the last 50 years including the underlying science societal expectations of forests and their management and the evolution of a globalized economy This textbook is an effort to comprehensively integrate this new knowledge of forest ecosystems and human concerns and needs into a management philosophy that is applicable to the vast majority of global forest lands Ecological forest management EFM is focused on policies and practices that maintain the integrity of forest ecosystems while achieving environmental economic and cultural goals of human societies EFM uses natural ecological models as its basis contrasting it with modern production forestry which is based on agronomic models and constrained by required return on investment Sections of the book consider 1 Basic concepts related to forest ecosystems and silviculture based on natural models 2 Social and political foundations of forestry including law economics and social acceptability 3 Important current topics including wildfire biological diversity and climate change and 4 Forest planning in an uncertain world from small privately owned lands to large public ownerships The book concludes with an overview of how EFM can contribute to resolving major 21st century issues in forestry including sustaining forest dependent societies

Advanced Biometrics with Deep Learning Andrew Teoh Beng Jin ,Lu Leng,2020-12-28 Biometrics such as fingerprint iris face hand print hand vein speech and gait recognition etc as a means of identity management have become commonplace nowadays for various applications Biometric systems follow a typical pipeline that is composed of separate preprocessing feature extraction and classification Deep learning as a data driven representation learning approach has been shown to be a promising alternative to conventional data agnostic and handcrafted pre processing and feature extraction for biometric systems Furthermore deep learning offers an end to end learning paradigm to unify preprocessing feature extraction and recognition based solely on biometric data This Special Issue has collected 12 high quality state of the art research papers that deal with challenging issues in advanced biometric systems based on deep learning The 12 papers can be divided into 4 categories according to biometric modality namely face

Zong,Jian-Yun Nie,Dongyan Zhao,Yansong Feng,2014-11-26 This book constitutes the refereed proceedings of the Third CCF Conference NLPCC 2014 held in Shenzhen China in December 2014 The 35 revised full papers presented together with 8 short papers were carefully reviewed and selected from 110 English submissions The papers are organized in topical sections on fundamentals on language computing applications on language computing machine translation and multi lingual information access machine learning for NLP NLP for social media NLP for search technology and ads question answering and user interaction web mining and information extraction Mobile Mapping Technologies Pablo

Rodríguez-González,Erica Nocerino,Isabella Toschi,2019-12-18 Mobile Mapping technologies have seen a rapid growth of research activity and interest in the last years due to the increased demand of accurate dense and geo referenced 3D data Their main characteristic is the ability of acquiring 3D information of large areas dynamically This versatility has expanded their application fields from the civil engineering to a broader range industry emergency response cultural heritage which is constantly widening This increased number of needs some of them specially challenging is pushing the Scientific Community as well as companies towards the development of innovative solutions ranging from new hardware open source software approaches and integration with other devices up to the adoption of artificial intelligence methods for the automatic extraction of salient features and quality assessment for performance verification The aim of the present book is to cover the most relevant topics and trends in Mobile Mapping Technology and also to introduce the new tendencies of this new paradigm of geospatial science *Observing, Modeling and Understanding Processes in Natural and Managed Peatlands*

Michel Bechtold,Björn Klöve,Annalea Lohila,Massimo Lupascu,Line Rochefort,Hanna Silvennoinen,2022-05-25 **Asteroids**

IV Patrick Michel,Francesca E. DeMeo,William F. Bottke,2015-12-31 Over the past decade asteroids have come to the forefront of planetary science Scientists across broad disciplines are increasingly recognizing that understanding asteroids is essential to discerning the basic processes of planetary formation including how their current distribution bespeaks our solar system s cataclysmic past For explorers the nearest asteroids beckon as the most accessible milestones in interplanetary space offering spaceflight destinations easier to reach than the lunar surface For futurists the prospects of asteroids as

commercial resources tantalize as a twenty first century gold rush albeit with far greater challenges than faced by nineteenth century pioneers For humanity it is the realization that asteroids matter It is not a question of if but when the next major impact will occur While the disaster probabilities are thankfully small fully cataloging and characterizing the potentially hazardous asteroid population remains unfinished business Asteroids IV sets the latest scientific foundation upon which all these topics and more will be built upon for the future Nearly 150 international authorities through more than 40 chapters convey the definitive state of the field by detailing our current astronomical compositional geological and geophysical knowledge of asteroids as well as their unique physical processes and interrelationships with comets and meteorites Most importantly this volume outlines the outstanding questions that will focus and drive researchers and students of all ages toward new advances in the coming decade and beyond
