

8 MOST COMMON FINGERPRINT PATTERNS

Three basic types and their subcategories

Plain Arch

It starts on one side of the finger and the ridge then slightly cascades upward.

Tented Arch

The tented arch lies in the ridges in the centre and is not continuous like the plain arch.

Ulnar Loop

These loops are not very common and most of the times will be found on the index fingers.

Radial Loop

The flow of this pattern runs from the thumb towards the little finger of the hand.

Double Loop

It has two distinct and separate shoulders for each core, two deltas and one or more ridges that make a complete circuit.

Plain Whorl

The ridges in these whorls make a turn of one complete circuit with two deltas and are therefore circular or spiral in shape.

Central Pocket Loop Whorl

These whorl ridges make one complete circuit and may be oval, circular, spiral or any variant of a circle.

Accidental Whorl

Whorls containing ridges that match the characteristics of a particular whorl sub-grouping are referred to as accidental whorls.
