Barnett,2001-06-27 With the complexity of the interactions between the methodology of science the principles of justice and the realities of the practice of law and criminalistics ethical issues frequently arise One of the hallmarks of a profession is a code of ethics to govern the actions of members of the profession with one another with users of the professio *Forensic Science Under Siege* Kelly Pyrek,2010-07-27 Forensic science laboratories reputations have increasingly come under fire Incidents of tainted evidence false reports allegations of negligence scientifically flawed testimony or worse yet perjury in court testimony have all served to cast a shadow over the forensic sciences Instances of each are just a few of the quality related charges made in the last few years Forensic Science Under Siege is the first book to integrate and explain these problematic trends in forensic science The issues are timely and are approached from an investigatory yet scholarly and research driven perspective Leading experts are consulted and interviewed including directors of highly visible forensic laboratories as well as medical examiners and coroners who are commandeering the discussions related to these issues Interviewees include Henry Lee Richard Saferstein Cyril Wecht and many others The ultimate consequences of all these pressures as well as the future of forensic science has yet to be determined This book examines these challenges while also exploring possible solutions such as the formation of a forensic science consortium to address specific legislative issues It is a must read for all forensic scientists Provides insight on the current state of forensic science demands and future direction as provided by leading experts in the field Consolidates the current state of standards and best practices of labs across disciplines Discusses a controversial topic that must be addressed for political support and financial funding of forensic science to improve An In-Depth Guide to Mobile Device Forensics Chuck Easttom,2021-10-21 Mobile devices are

ubiquitous therefore mobile device forensics is absolutely critical Whether for civil or criminal investigations being able to extract evidence from a mobile device is essential This book covers the technical details of mobile devices and transmissions as well as forensic methods for extracting evidence There are books on specific issues like Android forensics or iOS forensics but there is not currently a book that covers all the topics covered in this book Furthermore it is such a critical skill that mobile device forensics is the most common topic the Author is asked to teach to law enforcement This is a niche that is not being adequately filled with current titles An In Depth Guide to Mobile Device Forensics is aimed towards undergraduates

and graduate students studying cybersecurity or digital forensics It covers both technical and legal issues and includes exercises tests quizzes case studies and slides to aid comprehension *Science & Technology Review* ,2014

The Forensic Science Service Great Britain: Parliament: House of Commons: Science and Technology Committee,2011-07
The Science and Technology Committee is not confident that an orderly transition can be achieved by the extremely

challenging deadline for closure of the Forensic Science Service of March 2012 Extending the deadline by at least six months would allow the government to consult on and determine a wider strategy for forensic science In making its decision to close the FSS the government failed to give enough consideration to the impact on forensic science research and development the capacity of private providers to absorb the FSS's 60% market share and the wider implications for the criminal justice system These considerations appear to have been hastily overlooked in favour of the financial bottom line The report also draws attention to the historical inadequacies in government decision making that brought the FSS to its current financial situation The FSS's dire financial position appears to have arisen from a complex combination of factors principally the shrinking forensics market driven by increasing police in sourcing of forensic science services and a forensic procurement framework that has driven down prices and does not adequately recognise the value of complex forensic services In the transition to closure transferring work from the FSS to a non accredited police or private laboratory would be highly undesirable posing significant and unacceptable risks to criminal justice Proposals should be brought forward immediately to provide the Forensic Science Regulator with statutory powers to enforce compliance with quality standards
