The General Purpose, Metal/Mineral Capabilities of the Garrett Hunter BFO Series:

Garrett BFO's are acknowledged world-wide as true masters of all Beat Frequency Oscillator Detectors. They perform well in practically every treasure hunting task. If you prefer BFO operation but realize the BFO will not produce depth equal to that of the VLF/TR, then buy a Garrett BFO with confidence!

The Fully Adjustable Discriminating Capabilities:

Garrett "metered" discrimination gives you true BFO operation, plus the ability to reject nails, bottlecaps, aluminum pulltabs, and large metal objects. When you hear an audio response, a glance at the meter will tell you if the target should be dug. A fully adjustable control lets you set discrimination precisely where you want it!

Zero Drift Stability

Only an occasional retuning is all that is ever necessary with Garrett's ZERO-DRIFT STABILITY!

Eco-Sonic Media Jacob Smith,2015-06-05 The negative environmental effects of media culture are not often acknowledged the fuel required to keep huge server farms in operation landfills full of high tech junk and the extraction of rare minerals for devices reliant on them are just some of the hidden costs of the contemporary mediascape Eco Sonic Media brings an ecological critique to the history of sound media technologies in order to amplify the environmental undertones in sound studies and turn up the audio in discussions of greening the media

By looking at early and neglected forms of sound technology Jacob Smith seeks to create a revisionist ecologically aware history of sound media Delving into the history of pre electronic media like hand cranked gramophones comparatively eco friendly media artifacts such as the shellac discs that preceded the use of petroleum based vinyl early forms of portable technology like divining rods and even the use of songbirds as domestic music machines Smith builds a scaffolding of historical case studies to demonstrate how green media archaeology can make sound studies vibrate at an ecological frequency while opening the ears of eco criticism Throughout this eye opening and timely book he makes readers more aware of the costs and consequences of their personal media consumption by prompting comparisons with non digital non electronic technologies and by offering different ways in which sound media can become eco sonic media In the process he forges interdisciplinary connections opens new avenues of research and poses fresh theoretical questions for scholars and students of media sound studies and contemporary environmental history
