

The Gateway Experience

Congratulations!! You are embarking on an exciting and rewarding adventure. You are about to discover your ability to perceive, direct, and control your life in ways you never imagined possible. The Hemi-Sync process provides the tools. You supply the action.

Hemi-Sync® is a patented audio technology developed through 40 years of researching the influence of sound on human capabilities. Complex blends of Hemi-Sync sound frequencies facilitate different states of consciousness as you proceed through the Gateway Experience. There are no subliminal messages. You are in control.

Cultivate openness - Approach each exercise without expectations. Open yourself to the same childlike sense of wonder that characterized your first explorations of the physical world. Many people find it helpful to hold relaxation as their only goal, allowing them to notice and value subtle shifts in consciousness. Maintain awareness of your experience without judging and remember that you may perceive in different ways. Pay attention to **kinesthetic** sensations such as motion, tingling, or pulsing in your physical body. You may "see" lifelike or **symbolic images** in your mind's eye. **Auditory** perceptions may manifest as verbal messages, sounds, tones, or even music. Gateway participants often report **intuitive** perceptions of sudden comprehension, a knowing, a gestalt. There is no right or wrong way to experience these exercises. Allow yourself to appreciate and value the uniqueness of your own perceptions.

Recommendations for use - DO NOT LISTEN while driving. Use any standard quality stereo equipment with headphones in a distractionfree, darkened room where you can remain undisturbed for about 45 minutes. If exterior sounds penetrate, simply let them pass by. Do not use Dolby™ or other noise-reduction systems. Wait an hour after eating and use the bathroom before getting comfortable. Avoid alcohol, drugs, or excessive caffeine. Loosen tight clothing; remove shoes and glasses or contact lenses. Experiment with lying down or sitting with your head supported, to find out which you prefer. Adjust your position as needed: scratch an itch, pull up or remove a blanket when metabolic changes produce coolness or warmth.

Lower the volume so the words are barely within your hearing range. Otherwise the voice after a silent period may startle you. You may experience variations in the volume of the Hemi-Sync frequencies. These are intentional; do not readjust the volume.

Many people find that documenting their experiences in a journal is a fascinating method to reinforce learning and review progress. Try it. You may find it helpful to review the "frequently asked questions" (see below) from time to time as you move along.

Work with each exercise in sequence after you feel comfortable with the one(s) proceeding. The right pacing is different for each of us; there are no rules. You may listen to one exercise daily for a week or a month and then work at a slower or faster pace with others. Trust your intuition to know when you are ready to move on.

Engineering El Oualkadi, Ahmed,Zbitou, Jamal,2016-08-25 Wireless communications have become invaluable in the modern world The market is going through a revolutionary transformation as new technologies and standards endeavor to keep up with demand for integrated and low cost mobile and wireless devices Due to their ubiquity there is also a need for a simplification of the design of wireless systems and networks The Handbook of Research on Advanced Trends in Microwave and Communication Engineering showcases the current trends and approaches in the design and analysis of reconfigurable microwave devices antennas for wireless applications and wireless communication technologies Outlining both theoretical and experimental approaches this publication brings to light the unique design issues of this emerging research making it an ideal reference source for engineers researchers graduate students and IT professionals *The Verilog PLI Handbook*

Stuart Sutherland,2006-04-18 by Maq Mannan President and CEO DSM Technologies Chairman of the IEEE 1364 Verilog Standards Group Past Chairman of Open Verilog International One of the major strengths of the Verilog language is the Programming Language Interface PLI which allows users and Verilog application developers to infinitely extend the capabilities of the Verilog language and the Verilog simulator In fact the overwhelming success of the Verilog language can be partly attributed to the exi nce of its PLI Using the PLI add on products such as graphical waveform displays or pre and

post simulation analysis tools can be easily developed These products can then be used with any Verilog simulator that supports the Verilog PLI This ability to create third party add on products for Verilog simulators has created new markets and provided the Verilog user base with multiple sources of software tools Hardware design engineers can and should use the Verilog PLI to customize their Verilog simulation environment A Company that designs graphics chips for example may wish to see the simulation results of a new design in some custom graphical display The Verilog PLI makes it possible and even trivial to integrate custom software such as a graphical display program into a Verilog simulator The simulation results can then dynamically be displayed in the custom format during simulation And if the company uses Verilog simulators from multiple simulator vendors this integrated graphical display will work with all the simulators
