**acute angle:** an angle that has a measure less than a right angle ( $< 90^\circ$ )

**acute triangle:** a triangle in which all three angles are acute

**angle:** a figure formed by two rays that have a common endpoint

**base:** the bottom of a polygon or solid figure

**center:** the point from which all points on a circle are equally distant

**chord:** a line segment with its endpoints on a circle

**circle:** a closed plane figure with all points on the figure the same distance from the center

**closed figure:** a figure that begins and ends at the same point

**cone:** a solid figure with one circular base and one vertex

**congruent figures:** figures that have the same size and shape

**cube:** a solid figure whose 6 faces are all squares

**cylinder:** a solid figure with two congruent circular faces

communication trans receivers scattering in the devices needs to be decreased which can be achieved by replacing optoelectronic devices with photonic devices because in the latter only photons propagate electromagnetic waves

Contemporary Developments in High Frequency Photonic Devices is a crucial research book that examines high frequency photonics and their applications in communication engineering Featuring coverage on a wide range of topics such as metamaterials optoelectronic devices and plasmonics this book is excellent for students researchers engineers and professionals

**Semiconductor TeraHertz Technology** Guillermo Carpintero, Enrique Garcia-Munoz, Hans Hartnagel, Sascha Preu, Antti Raisanen, 2015-09-28 Key advances in Semiconductor Terahertz THz Technology now promises important new applications enabling scientists and engineers to overcome the challenges of accessing the so called terahertz gap This pioneering reference explains the fundamental methods and surveys innovative techniques in the generation detection and processing of THz waves with solid state devices as well as illustrating their potential applications in security and telecommunications among other fields With contributions from leading experts Semiconductor Terahertz Technology Devices and Systems at Room Temperature Operation comprehensively and systematically covers semiconductor based room temperature operating sources such as photomixers THz antennas radiation concepts and THz propagation as well as room temperature operating THz detectors The second part of the book focuses on applications such as the latest photonic and electronic THz systems as well as emerging THz technologies including whispering gallery resonators liquid crystals metamaterials and graphene based devices This book will provide support for practicing researchers and professionals and will be an indispensable reference to graduate students in the field of THz technology Key features Includes crucial theoretical background sections to photomixers photoconductive switches and electronic THz generation detection Provides an extensive overview of semiconductor based THz sources and applications Discusses vital technologies for affordable THz applications Supports teaching and studying increasingly popular courses on semiconductor THz technology

**Electromagnetic Boundary Problems** Edward F. Kuester, David C. Chang, 2015-09-15 Electromagnetic Boundary Problems introduces the formulation and solution of Maxwell's equations describing electromagnetism Based on a one semester graduate level course taught by the authors the text covers material parameters equivalence principles field and source stream potentials and uniqueness as well as Provides analytical solutions of waves in regions with planar cylindrical spherical and wedge boundaries Explores the formulation of integral equations and their analytical solutions in some simple cases Discusses approximation techniques for problems without exact analytical solutions Presents a general proof that no classical electromagnetic field can travel faster than the speed of light Features end of chapter problems that increase comprehension of key concepts and fuel additional research Electromagnetic Boundary Problems uses generalized functions consistently to treat problems that would otherwise be more difficult such as jump conditions motion of wavefronts and reflection from a moving conductor The book offers valuable insight into how and why various formulation and solution
