Tomer, 2016-04-05 For the most part human capital theory emphasizes human cognitive development and the acquisition of knowledge and skills that enable enhanced productivity and earnings In light of recent research findings particularly concerning neurodevelopment and early childhood development it is becoming apparent that this standard version of human capital theory has a far too limited conception of human capabilities and how they are created Integrating Human Capital with Human Development considers

recently accumulated knowledge related to the human brain's functioning and development to better understand the relationship between human capital and human development in successful economies. It shifts the focus of human capital theory to give full consideration to intangible non-cognitive aspects of learning. This exciting new volume is an important addition to the study of human capital and behavioral economics more broadly.
