Success in Early Intervention Arthur J. Reynolds, 2000-01-01 This book is a valuable source of information on the long term effects of early intervention programs on the education of children living in economically disadvantaged areas and in

other contexts Early intervention programs such as Head Start enjoy popular and legislative support but until now policymakers and practitioners have lacked hard data on the long term consequences of such locally and federally mandated efforts Success in Early Intervention focuses on the Child Parent Center CPC program in Chicago the second oldest after Head Start federally funded early childhood intervention program Begun in 1967 the program currently operates out of twenty four centers which are located in proximity to the elementary schools they serve The CPC program s unique features include mandatory parental involvement and a single sustained educational system that spans preschool through the third grade Central to this study is a 1986 cohort of nearly twelve hundred CPC children and a comparison group of low income children whose subsequent activities challenges and achievements are followed through the age of fifteen The lives of these children amply demonstrate the positive long term educational and social consequences of the CPC program Teacher Assemblage P. Taylor Webb,2009-01-01 Teacher Assemblage is a groundbreaking report in the tradition of fieldwork in philosophy using Michel Foucault s and Gilles Deleuze s ideas to better understand how accountability policy affected teachers The case study examines different vectors of power and demonstrates how teachers interacted with each other and interacted with their immediate policy environments This unique book provides readers with grounded insights into Foucault s and Deleuze s ideas by paying close attention to the macro and micro political worlds of schools as teachers struggle with new forms of performance accountability The book illustrates ideas of power politics and policy with a unique use of surrealist art to illustrate the philosophical ideas at play in the case study The book will have a wide appeal to teachers teacher educators educational researchers policy and curriculum scholars art aficionados and those interested in the thoughts of Michel Foucault and Gilles Deleuze Schoolwide Test Preparation Steven H. Embedding Questions National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee on Embedding Common Test Items in State and District Assessments, 1999-11-17 Policy makers are caught between two powerful forces in relation to testing in America's schools One is increased interest on the part of educators reinforced by federal requirements in developing tests that accurately reflect local educational standards and goals The other is a strong push to gather information about the performance of students and schools relative to national and international standards and norms The difficulty of achieving these two goals simultaneously is exacerbated by both the long standing American tradition of local control of education and the growing public sentiment that students already take enough tests Finding a solution to this dilemma has been the focus of numerous debates surrounding the Voluntary National Tests proposed by President Clinton in his 1997 State of the Union address It was also the topic of a congressionally mandated 1998 National Research Council report Uncommon Measures Equivalence and Linkage Among Educational Tests and was touched upon in a U S General Accounting Office report Student Testing Issues Related to Voluntary National Mathematics and Reading Tests More recently Congress asked the National Research Council to determine the technical feasibility validity and reliability of embedding test items from the National Assessment of Educational Progress or other tests in state and district assessments in 4th grade reading and 8th grade mathematics for the purpose of developing a valid measure of student achievement within states and districts and in terms of national performance standards or scales This report is the response to that congressional mandate
