A Sociology of Religious Freedom Olga Breskaya, Giuseppe

Giordan, James T. Richardson, 2024-09-27 In recent years the relevance of religious freedom has spread well beyond academia becoming a reference point for international relations multi level policy development as well as interfaith negotiations Meanwhile scholarship on religious freedom has flourished on the boundaries of sociology law comparative politics history and theology This book presents a systematic sociological analysis of religious freedom bringing together classical sociological theories and empirical perspectives developed during the last three decades It addresses three major questions involved in any sociology of religious freedom First considering its complex and controversial nature how can religious freedom be defined Second what are the recurrent sociological conditions and relevant social perceptions that will foster an understanding of religious freedom in varying political legal and socioreligious contexts And third what are the mechanisms of social implementation of religious freedom that contribute to making it a fundamental value in a society Olga Breskaya Giuseppe Giordan and James T Richardson suggest that a sociological definition of religious freedom requires us to take into account historical philosophical legal religious and political considerations of a given society and that the social dimensions of religious freedom are as important as the legal ones

Drug Control and

International Law Daniel Wisheart, 2018-10-08 This book provides for an extensive legal analysis of the international drug control system in light of the growing challenges and criticism that this system faces In the current debate on global drug policy the central pillars of the international drug control system the UN Drug Conventions as well as its institutions are portrayed as outdated suppressive and seen as an obstacle to necessary changes The book's objective is to provide an in depth and positivist insight into drug control's present legal framework and thus provide for a better understanding of the normative assumptions upon which drug control is currently based This is attained by clarifying the objectives of the international drug control system and the premises by which these objectives are to be achieved The objective of the current global framework of international drug control is the limitation of drugs to medical and scientific purposes The meaning of this objective and its concrete implications for States parties as well as its problems from the perspective of other regimes of international law most notably international human rights law are extensively analysed Additionally the book focuses on how the international drug control system attempts to reach the objective of confining drugs to medical and scientific purposes i e by setting up a universal system that exercises a rigid control on drug supply The consequences of this heavy focus on the reduction of drug supply are outlined and the book concludes by making suggestions on how the international drug control system could be reformed in the near future in order to better meet the existing challenges The analysis occurs from a general international law perspective It aims to map the international drug control system within a wider context of international law and to understand whether the problems that the international drug control system faces are exemplary for the difficulties that institutionalized systems of global scope face in the twenty first century

Why Women Will Save the Planet Friends of the Earth, 2015-12-01 Cities across the globe are growing fast Today many are environmental nightmares with polluted air excessive energy consumption and an absence of nature But big cities don't have to mean a dystopian future They can be turned around to be powerhouses of well being and environmental stability if we empower women This book is a unique collaboration between C40 and Friends of the Earth showcasing pioneering voices in the environmental and feminist movements This book reveals just how women's empowerment is critical to environmental sustainability This book is a rallying call for the planet for women for everyone

Bioethics Megan-Jane Johnstone, 2015-11-20 An essential resource for both undergraduate and postgraduate students and registered nurses to develop new insights and moral wisdom around ethical issues they will face in clinical practice. Bioethics: A Nursing Perspective 6th Edition continues to set the standard for bioethical issues in nursing practice. As with previous editions, this highly respected text provides a comprehensive framework to assist students and registered nurses to understand the ethical challenges, obligations and responsibilities they will encounter in daily practice. Greater depth on ethical issues, particularly those concerned with ethical conduct, unprofessional conduct and professional misconduct and morality, politics, case scenarios and critical questions to encourage students and registered nurses to reflect on key issues that relate to their own practice. New chapters: Ethics, dehumanisation and vulnerable populations; Professional obligations to report harmful behaviours with a focus on impaired practitioners; child abuse and elder abuse. Introduces a new concept: cultural humility. Content on needs versus wants, the right not to be informed, palliative sedation, preventing ethical conflicts, the relationship between professional judgment and moral decision making in nursing and health care contexts and future ethical difficulties concerned with climate change, peak oil, pandemic influenza, antimicrobial resistance and health inequalities. All chapters and references have been updated to reflect contemporary nursing practice locally and globally.

Making Use of Deleuze in Planning Gareth Abrahams, 2016-10-04 *Making Use of Deleuze in Planning* translates and re-creates some of Gilles Deleuze's most abstract philosophical concepts to form a new practicable planning assessment tool. It shows what his philosophy can do for planning theory as well as planning assessment practice and in doing so sets out a pragmatic approach to Deleuzian studies, one that helps form bridges between ontological problems and the problems found in professional practice. It also breaks new ground in assessment methodology by challenging the essentialist ideas underpinning assessment methods like BREEAM and setting out and testing a new form of non-essentialist assessment named SIAM. The book argues that Deleuze's philosophy can be made useful to planning as long as one is prepared to adapt and re-create his key ontological concepts to respond to the specific demands of the field.

Extending Experimentalist Governance? Jonathan Zeitlin, 2015-08-13 Extending Experimentalist Governance takes as its point of departure three observations about the current state of transnational regulation within and beyond the EU Across a wide and expanding range of policy fields the EU has developed over the past 15 years a new architecture of experimentalist governance based on framework rule making and revision through recursive review of implementation experience in diverse local contexts Through a variety of institutional mechanisms and channels the EU is actively seeking to extend its own internal rules norms standards and governance processes beyond the Union's borders to third countries and the wider world In a number of major issue areas experimentalist regimes with similar architectural features to those within the EU appear to be developing on a global or transnational scale The book's goal is to explore both empirically and theoretically the relationship between these three contemporaneous trends and to assess their consequences for the EU's evolving role in transnational regulation The book tackles these questions about the external dimension of EU experimentalist governance and its relationship to broader trends in transnational regulation through in depth analysis of recent developments across a series of key policy domains by a distinguished interdisciplinary group of European and North American scholars The domains addressed include neighbourhood policy food safety GMOs chemicals forestry competition finance data privacy disability rights crisis
