IBM defines a smarter city as one that makes optimal use of all available information to better understand and control its operations and optimize the use of resources. There is much information available from different sources. However, city officials often lack the holistic view of the city's operations that is required to respond to the citizens' needs in a timely manner and use the city resources wisely. IBM Intelligent Operations Center delivers a unified view of city agencies providing three primary elements for successful management of cities: use information, anticipate problems, and coordinate actions and resources. Chapter 1 of this IBM Redbooks publication introduces the IBM Intelligent Operations Center solution. The chapter provides a high level overview of its features, benefits, and architecture. This information is intended for city officials and IT architects that must understand the business value of IBM Intelligent Operations Center and its architecture. The remaining chapters of this book focus on information that help IBM Intelligent Operations Center administrators perform daily administration tasks. This book describes commands and tools that IBM Intelligent Operations Center administrators must use to keep the solution running, troubleshoot and diagnose problems, and perform preventive maintenance. This book includes preferred practices, tips, and techniques and general suggestions for administrators of IBM Intelligent Operations Center on-premises deployments. For related information about this topic, refer to the following IBM Redbooks publications: IBM Intelligent Operations Center for Smarter Cities Redpaper REDP 4939, IBM Intelligent Operations Center for Smarter Cities Solution Guide, Russell's Official National Motor Coach Guide, 1959 Official publication of bus lines for United States and Canada, BIRT by Example Paul Bappoo, 2012-11-01. Not only can this book teach you BIRT quickly and easily with lots of practical step by step examples, but it is also a darn good read, says Paul's mum. Admittedly, she doesn't know much about software, so you may just have to delve into these pages yourself to learn. Report Templates, Libraries, and Master Pages, Switching between databases dynamically, BIRT with Oracle, Applying style sheets to BIRT reports, How to debug your BIRT JavaScript, How to hide empty fields, Using a stored procedure as a data set, How to edit, insert, and delete records from a database with BIRT, Using web services as a data source, A Twitter feed built in BIRT, Building reports into Java Server Pages, Installing BIRT on Ubuntu, and more.
