King of the Norfolk Poachers, The: His Life and Times Charlotte Paton,2009-10-01 In the early 1930s an elderly mole catcher became the subject of one of East Anglia s best loved tales of country life I Walked by Night Over sixty years later Norfolk writer Charlotte Paton became fascinated by this man and set out to find the truth about him beginning with his name Frederick Rolfe Charlotte conducted exhaustive research provide a vibrant account with plenty of social history This book is the biography of a difficult man who could inspire devotion but came to a tragic end AEC Mandator: Volume 8 Graham Edge,2016-10-24 When the AEC Mandator V8 was introduced in 1968 it carried with it high hopes for the future of AEC and the Leyland Group Nothing remotely like it had been produced before Word soon got around about its excellent performance However just as word had spread about the initial performance of the model so news soon travelled about the problems arising in service Eventually the lorry was withdrawn from sale Since the early 1970s when most of the 300 or so Mandator V8s sold in the UK had been withdrawn there has always been a strong undercurrent of interest shown in it AEC Mandator V8 has been out of print for many years and has been brought back in 2016 to make this fascinating story available again to AEC enthusiasts and those with an interest in general transport history Graham Edge is a trucking journalist and author Series Commercial Vehicles Archive Series Subject Commercial Vehicles Transportation **The Leyland Octopus** Graham Edge,2004-09-14 Rigid eight wheelers with internal combustion engines were developed as a response to requirements and opportunities embedded in the 1933 Road and Rail Traffic Act Although AEC was first in the field in late 1934 or early 1935 Leyland was able to announce its Octopus By the Second World War the Octopus had become a favourite

with operators known to carry a legal payload economically and reliably After the war the driveline of the Octopus basically remained unchanged until 1960 Specification options were few yet the model remained a market leader with lengthy waiting lists for new chassis The model remained in production until the late 1970s and as AEC authority Graham Edge writes For most of its productive life the Leyland Octopus was the definitive British eight wheeler lorry The many superb photographs in this book range from shots from the 1930s including what is probably the first Octopus chassis and a rare TEW tipper to 1979 and an Octopus 2 which started service that year with a compacting refuse body The text covers the full production story and there are Appendices which give chassis and engine details **The Long Haul Pioneers** Ashley

Coghill,2020-02-01 It all started in 1964 when two friends gave up promising medical careers to embark upon a journey which few hardened truckers would have considered In so doing they were solely responsible for creating the first long haul overland route across Europe and deep into the Middle East to Kabul The men had started the Middle East Run was to become a phenomenon in the road haulage industry an image which it still holds today This book is about the company founded by one of those men from its fledgling days as Asian Transport to the thriving Astran Cargo Services Ltd that it is today In this book Ashley Coghill documents the complete history of the company to date with the focus predominantly on the early days when the men were fighting for something and revelling in the adventure These early long haul drivers would think nothing of a 10 000 mile round trip to Iran or the Arabian Gulf and being stranded at 6 000 feet on a mountain pass with temperatures below 40 was just all in a day s work Ashley Coghill has an immense enthusiasm for his subject and has given his research total dedication He has also tracked down past and present employees to gather first hand information which he has illustrated with over 300 carefully selected images The end result is a detailed comprehensive and fascinating account of an extraordinary company *Not All Sunshine and Sand: The Tales of a UK-Middle East Truck Driver* Paul

Rowlands,2016-08-19 Recounting his many hair raising experiences as a truck driver on the Middle East run some of them humorous some alarming Paul Rowlands recalls the camaraderie of the trucking fraternity This book takes the reader on a ride through foreign lands in the cab of a long haul lorry providing an insider s perspective on overland travel A tremendous tale in which run ins with the locals dramatic encounters with foreign drivers and mechanical problems seem the norm for a long haul lorry driver Paul Rowlands takes us into his world as a truck driver initially around rural Suffolk and the rest of the UK before embarking on the Middle East run The long distance lorry driver deals with life in the raw with many hardships and occasional comforts difficulties are tempered by the sheer beauty of mountain passes lakeside stops and the generous hospitality of the people he meets Trucking camaraderie has seen Paul through many a crisis and he shares the belief that help is always at hand when a fellow driver is facing a problem The new edition of this hugely popular book incorporates 72 photographs taken at the time many of which have never been previously published Leyland Comet Graham

Edge,2019-10-01 This book is about one of Leyland Motors famous models the Leyland Comet It covers the period from the

introduction of the lorry in 1947 to its withdrawal from the British market in the mid 1970s This illustrious name continued to be used in the Leyland DAF era such is the high regard and respect earned by one of Leyland s finest vehicles not only here but also overseas Leyland Comet presents the initial development of the model and the various types which evolved in subsequent years When it was first introduced the Leyland Comet was an immediate success and soon became the market leader in the high quality medium weight lorry sector In the 30 years of production history described in these pages the Comet was only seriously challenged by its great rival the AEC Mercury In its heyday the Leyland Motors name was synonymous with top quality Their Comet range maintained and enhanced the company s reputation Many small haulage firms building a business in the post war years aspired to a Leyland lorry and felt a great sense of achievement when able to acquire one This book has been out of print for many years and has been brought back in 2016 to make this fascinating story available again to Leyland enthusiasts and those with an interest in general transport history Graham Edge is a trucking journalist and author Series Commercial Vehicles Archive Series Subject Commercial Vehicles Transportation **Cola Cowboys** Franklyn Wood,2010-03-01 This vivid account tells the story of the truckers who were driving from the UK to the Middle East in the early 1980s The journey was rough tough exhausting dirty uncomfortable and dangerous Journalist Franklyn Wood reports that in the course of the one trip we are following seven Britons died in accidents Among the physical hazards were icy mountain hairpins unmade roads and desert sandstorms Human hazards included Kamikaze coach drivers robbers mind numbingly slow border controls rogue police and the temptations of the drivers favourite watering holes The route led from Europe through Turkey Iraq during its war with Iran and on to the wealth and culture shock of Saudi Arabia The cargoes were often worth a million pounds Delivering them and returning home for the next load this was the Olympics of truck driving Cola Cowboys was originally published in 1982 when it proved extremely popular It has been out of print for many years and has been reprinted by popular demand [The Vodka-Cola Cowboy: Trucking Russia 1990 - 1995](#) Mick Twemlow,2020-05-01 The Vodka Cola Cowboy describes life trucking in what is possibly the harshest environment in the world Russia Between 1990 and 1995 British owner driver Mick Twemlow worked to transport goods to from and within Russia and the wider Soviet Union Living in Moscow with his future wife Elena and their daughter Margarita who was born there in 1992 Mick learned the language and fully immersed himself in Russian society giving him an insider s view of this time of massive upheaval in the Soviet Union The book vividly illustrates the conditions that British truck drivers encountered such as the atrocious winter weather in a wild and unforgiving landscape police harassment and the dangers that came with the dissolution of the USSR Mick was the only British truck driver in Moscow throughout the whole of the anti Gorbachev coup of 1991 and so the book offers a unique perspective of that historical event The incidents described in the book range from the humorous to the serious to the potentially life threatening This book will primarily be of interest to truck drivers and those with an interest in road transport and the haulage industry in general Russia is still an unknown quantity

Oily Hands and the Smell of Diesel David Harris, 2017-09-29 1960 saw the dawn of an era of unprecedented innovation and development in farm machinery. It was a period of rapid technical advancement that produced machines which are the mainstay of the current very buoyant vintage tractor restoration movement. At the start of the decade spark ignition Standard Fordson tractors still occasionally required repair; by the end of the decade the Fordson Diesel Major had been replaced by the Ford 1000 series. The history of these iconic brands is well known. Oily Hands and the Smell of Diesel gives an alternative view, the inside story of the agricultural machinery repair trade. First employed as an apprentice then moving his way up to an engineer, David Harris gives an entertaining, informative and personal account of his time spent at a Ford main tractor dealership working on Ford Fordson County Roadless and Muirhill tractors, Chaseside loaders, Claas combines and New Holland and Jones balers amongst others. Including many historical photographs, David describes the technical challenges in detail and tells of the ups and downs of life in the workshop and out in the field. This book will be a must read for anyone who is or was involved in the machinery industry, anyone looking to restore or repair vintage agricultural machinery and anyone with a general interest in farming and machinery history.
