Biotechnology, Education and Life Politics Pádraig Murphy, 2014-04-24 What should individuals and society do when genetic screening becomes widely available and with its impact on current and future generations still uncertain How can our education systems around the world respond to these developments Reproductive and genetic technologies RGTs are increasingly controversial and political We are entering an era where we can design future humans firstly by genetic screening of undesirable traits or indeed embryos but perhaps later by more radical genetic engineering This has a profound effect on what we see as normal acceptable and responsible This book argues that these urgent and biopolitical issues should be central to how biology is taught as a subject Debate about life itself has always been at the forefront of connected molecular genetic and social personal identity levels and each of these levels requires processes of communication and debate what Anthony Giddens called in passing life politics In this book P draig Murphy opens the term up with examples from field research in schools student responses to educational films exploring the future of RGTs and science studies of strategic biotechnology and the lab practices of genetic screening Life political debate is thoroughly examined and is identified as a way of connecting mainstream education of biology with future generations Biotechnology Education and Life Politics will appeal to post graduates and academics involved with science education science communication communication studies and the sociology of education

Bioethics Sean D. Aas, Collin O'Neil, Chiara Lepora, 2024-02-12 Bioethics 50 Puzzles

Problems and Thought Experiments collects 50 cases both real and imaginary that have been or should be of special interest and importance to philosophical bioethics. Cases are collected together under topical headings in a natural order for an introductory course in bioethics. Each case is described in a few pages which includes bioethical context, a concise narrative of the case itself, and a discussion of its importance both for broader philosophical issues and for practical problems in clinical ethics and health policy. Each entry also contains a brief annotated list of suggested readings. In addition to the classic cases in bioethics, the book contains discussion of cases that involve several emerging bioethical issues, especially issues around disability, social justice, and the practice of medicine in a diverse and globalized world.

Key Features:

- Gives readers all chapters presented in an identical format.
- The Case Responses Suggested Readings Includes reference to up to date literature in journals devoted both to more generalist ethics and to bioethics.
- Offers short and self contained chapters allowing students to quickly understand an issue and giving instructors flexibility in assigning readings to match the themes of the course.
- Features actual or lightly fictionalized cases in humanitarian aid offering a type of case that is often underrepresented in bioethics books.

Authored by three scholars who are actively involved in the central research areas of bioethics.

Living with Cyberspace John Armitage, Joanne Roberts, 2003-02-01 Cyberspace and cyber technology have impacted on every aspect of our lives. Western society, culture, politics, and economics are now all intricately bound with cyberspace. Living With Cyberspace brings together the leading cyber theorists of North America, Britain, and Australia to map the present and the future of cyberspace. Presenting a guidebook to our new world, both the theory and the practice, the book covers subjects as diverse as androids, biotech, electronic commerce, the acceleration of everyday life, access to information, the alliance between the military and the entertainment industries, feminism, democratic practice, and human consciousness itself. Together, the essays, divided into separately introduced sections on society, culture, politics, and economics, present a systematic and state of the art overview of technology and society in the 21st Century.
