Please write answers in your journal

1. As the opening credits roll, the letters A, T, C and G get highlighted in people's names. Describe the significance of these letters.
2. Write the complimentary strand of DNA nucleotide bases for a segment of DNA with nucleotide base sequence: GATTACA.
3. What is the significance of the spiral staircase in Jerome and Vincent's home?
4. Health benefits provided by employers and health insurance companies help pay for their employees' care if they become ill. Explain how a gene test could be *used against* a prospective employee or someone applying for insurance. How were Vincent's genes used against him in the movie?
5. DNA for genetic testing can be collected from a small amount of blood, hair, saliva, and other body fluids. During a party scene in GATTACA, a woman submits a saliva sample from a recent kiss to screen her potential boyfriend/husband's DNA. Do you think that she was violating his rights by doing this without his knowledge, or is she just protecting herself from choosing an unsuitable partner?
6. How much would a DNA test reveal about someone's personality and intelligence?
7. We witnessed Vincent's parents visiting a doctor who specialized in child conception to select for the best traits for his future brother. The parents hoped that his brother would have the best possible chances for a successful life. Some of the traits mentioned in GATTACA included any possibility of inherited diseases, height, and perhaps intelligence. If you and your partner decide to have a child one day and are given the opportunity to select for special traits, would you do so? Why or why not?
8. What extreme measures is Vincent willing to undertake to achieve his dreams?
9. Discuss the real Jerome "Eugene" Morrow. How is his relationship with Vincent symbiotic? In what ways is perfection both a burden and a curse?
10. A *cautionary tale* attempts to warn the viewer about the flaws of an individual or society. What warning is the film attempting to raise? How does the film do this?

Engineering the Human Bert Jaap Koops, Christoph H. Lüthy, Annemiek Nelis, Carla Sieburgh, J.P.M. Jansen, Monika S. Schmid, 2013-02-12 The volume is collection of articles treating the topic of human improvement enhancement from a variety

of perspectives philosophical literary medical genetic sociological legal etc The chapters in this volume treat not only those aspects that most immediately come to mind when one thinks of human enhancement such as genetic engineering cloning artificial implants and artificial intelligence etc Somewhat less obvious aspects include evolutionary perspectives in connection with the prolongation of the human lifespan plastic surgery since its beginnings and questions such as whether the distinction between natural and artificial can really be drawn at all and how it has been conceived across the ages or what the legal implications are of recent developments and techniques Many papers make links to the representation of these developments in popular culture from Jules Verne through Aldous Huxley to the movie Gattaca address the hopes and fears that come with them as well as the question how realistic these are While all chapters are written by scientists at the international top of their respective fields all are accessible to a non specialist audience and eminently readable We believe that they represent a state of the art overview of questions that are of interest to a large audience The book thus targets a non specialist audience with an interest in philosophical sociological scientific and legal issues involved in both traditional and recent matters concerning the desire of mankind to improve itself the human body the human mind and the human condition It is unique in that it brings together all these aspects within a coherent and cohesive collection *Classic Questions and Contemporary Film* Dean A. Kowalski,2015-08-24

Featuring significant revisions and updates *Classic Questions and Contemporary Film An Introduction to Philosophy* 2nd Edition uses popular movies as a highly accessible framework for introducing key philosophical concepts Explores 28 films with 18 new to this edition including *Eternal Sunshine of the Spotless Mind* *Hotel Rwanda* *V for Vendetta* and *Memento* Discusses numerous philosophical issues not covered in the first edition including a new chapter covering issues of personal identity the meaningfulness of life and death and existentialism Offers a rich pedagogical framework comprised of key classic readings chapter learning outcomes jargon free argument analysis critical thinking and trivia questions a glossary of terms and textboxes with notes on the movies discussed Revised to be even more accessible to beginning philosophers **The Human Genome Project in College**

Curriculum Aine Donovan,Ronald Michael Green,2008 Begun formally in 1990 the U S Human Genome Project s HGP goals were to identify all the 20 000 to 25 000 genes in human DNA determine the sequences of the three billion chemical base pairs that make up human DNA store this information in databases improve tools for data analysis and transfer related technologies to the private sector It was the first large scientific undertaking to address potential issues that arose from project data and opened up vast possibilities for the use of genetic data and the alteration of our genetic makeup This volume is the first to address the diverse range of ethical issues arising from the HGP and enables professors to bring this critically important topic to life in the classroom Digital Personalized Health and Medicine L.B. Pape-Haugaard,C. Lovis,I. Cort Madsen,2020-06-17 Digital health and medical informatics have grown in importance in recent years and have now become central to the provision of effective healthcare around the world This book presents the proceedings of the 30th Medical

Informatics Europe conference MIE This edition of the conference hosted by the European Federation for Medical Informatics EFMI since the 1970s was due to be held in Geneva Switzerland in April 2020 but as a result of measures to prevent the spread of the Covid19 pandemic the conference itself had to be cancelled Nevertheless because this collection of papers offers a wealth of knowledge and experience across the full spectrum of digital health and medicine it was decided to publish the submissions accepted in the review process and confirmed by the Scientific Program Committee for publication and these are published here as planned The 232 papers are themed under 6 section headings biomedical data tools and methods supporting care delivery health and prevention precision medicine and public health human factors and citizen centered digital health and ethics legal and societal aspects A 7th section deals with the Swiss personalized health network and section 8 includes the 125 posters accepted for the conference Offering an overview of current trends and developments in digital health and medical informatics the book provides a valuable information resource for researchers and health practitioners alike

Making Sense of Nature Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences
