Twenty Years of Education Transformation in Gauteng 1994 to 2014 Maringe, Felix, Prew, Martin, 2015-05-05
Twenty Years of Education Transformation in Gauteng 1994 to 2014 An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things, whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years. **Annual Report** South Africa. Department of Basic Education, 2016

Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East Cynthia S. Sunal, Oluseyi Matthew Odebiyi, Kagendo Mutua, 2022-06-01
As the demand for education at all levels has increased, so have the models of meeting these increased demands for education. As in many other parts of the world, public education has expanded to serve large populations across the regions of Africa, the Caribbean, and the Middle East. Many nations in these regions have instituted mandates, policies, and frameworks intended to simultaneously increase access to public education opportunities as well as improve the quality of education provided and to address a wide populace. Because the increase in educational demand has occurred at all levels, these efforts often address various levels of education from early childhood through primary schooling, junior secondary and secondary schooling, and into tertiary education. Efforts also have been made to increase participation in education by marginalized and/or special populations. The range of efforts is large, with some focusing on involving migrants, immigrants, refugees in primary education, while others aim at opening up choices at the university level. Recently, nations in the region have recognized the possibilities of digital learning. Online learning, as cell phones and other widely used portable wireless devices have made it possible to sell the idea that one can learn from anywhere at any time. This widespread access to technology has made it possible for governments as well as private entities to expand learning opportunities even to populations previously unreached or to address difficult-to-reach sectors of the population. At the same time, the population itself has not only increased in numbers but in diversity. Maintaining quality through digital and other means of quick expansion of educational opportunities continues to be challenging, if not problematic.
