Schools Bob Lingard,Greg Thompson,Sam Sellar,2015-11-06 Over the last two decades large scale national or provincial standardised testing has become prominent in the schools of many countries around the globe National Testing in Schools An Australian Assessment draws on research to consider the nature of national testing and its multiple effects including media responses and constructions such as league tables of performance pressures within school systems and on schools effects on the work and identities of principals and teachers and impacts on the experience of schooling for many young people including those least advantaged Using Australia as the case site for global concerns regarding national testing this book will be an invaluable companion for education researchers teacher educators teacher education students and teachers globally

The Science of Learning and Development in Education Minkang Kim,Derek Sankey,2022-05-26 All teachers need to know how children and adolescents learn and develop Traditionally this knowledge had been informed by a mix of speculative and scientific theory However in the past three decades there has been substantial growth in new scientific knowledge about how we learn The Science of Learning and Development in Education provides an exciting and comprehensive introduction to this field This innovative text introduces readers to brain science and the science of complex systems as it applies to human development Section 1 examines the science of learning and development in the 21st century Section 2 explores the emotional cultural moral and empathetic brain and Section 3 focuses on learning wellbeing and the ecology of learning environments Written in an engaging style by leading experts and generously illustrated with colour photographs and diagrams The Science of Learning and Development in Education is an essential resource for pre service teachers *Governing by Numbers* Stephen Ball,2018-10-11 Social science researchers have become increasingly attentive to the role of numbers in contemporary life Issues around big data national test results and output and performance statistics

are now routinely reported and debated in the media Numbers are a powerful resource for governments as a means to manage and improve their populations and we are increasingly represented organized and driven by an economy of numbers which inserts itself into more and more aspects of our lives This book critically addresses some of the ways in which numbers are deployed in educational governance and practice and some of the consequences of this deployment for what it means to be educated to teach and to learn Recognising that numbers do not simply represent but that they change things and have real effects allows us to move beyond a system where difficult and important issues about what we want from education and from teachers are side stepped in the push to improve our numbers This collection offers a set of starting points from which we might speak back to numbers drawing on research to explore how numbers change the way we think about ourselves and what we do This book was originally published as a special issue of the Journal of Education Policy **Primary**
