The purpose of this paper is to think of a particular time in my childhood and apply Brothelrliness's five systems to that particular time. Erie Brothelrliness's ecological theory in child development suggest that five levels of the environment simultaneously influences us as children. Frontbencher believes that we cannot fully understand the phenomenon of continuity and bio-psychological characteristics of a child without considering how we are influence by each level of our environment.

The 5 levels he mentions are, Microsystems, Microsystems, Ecosystem, Microsystems and Chronometers (Feldman 2011). I grew up on the island of Montmartre which is a British territory, where the environment helped shape who I am today. I moved to the united states when I was 13 years old, where I realized that life there was much different than what I was accustom to, for I no longer had the support from the community and family members I had grown so accustomed to.

This is why I found Brothelrliness's biological approach so interesting because it reminded me just how much I had lost and how much I had achieved. The particular time period in my childhood that I would like to discuss in this essay is when I was about 10 years old. I chose this time period due to the fact that this was a time when life changed for my family and me in more ways than one, in some ways positive but in many ways negative. The most serious impact on my life occurred at the age of 10 years old, which I will be discussing in detail further on in this essay.

### Essay On Human Development

In my case the immediate environment at that time were my friends, teachers, brothers, and the community, they were part of the long-term immediate environment in which I placed my trust, other temporary Microsystems that came and went are athletic clubs, boy scouts, and church, through those Microsystems I got a chance to build relationships, built various skills, and I also learned how to socialize through personal experience.

At about age 10 I developed a love for track and field and went on to win numerous medals in school which is a personal success story of mine. In this peri

Walter Leal Filho, Amanda Lange Salvia, Claudio Ruy Portela de Vasconcelos, 2024-09-20 This book involves establishing a set of priorities and a roadmap that can guide scholarly and practical efforts towards sustainability goals. It also supports the development of robust methodologies for conducting research, including quantitative, qualitative, and mixed methods approaches. But despite the importance of and the need for an agenda for sustainable development research, many efforts are isolated and thematically disconnected. Also, it is difficult to find information on how sustainability research is being undertaken and on the wide range of methods being used. Against this backdrop and in order to facilitate a broad discussion on the contribution of sustainable development research, this book is being produced. The book gathers inputs from universities and research organisations working on matters related to sustainable development research in a variety of contexts. It also provides a platform for the dissemination of information on the latest initiatives paving the way for technology transfer and networking. Furthermore, the book intends to provide a fertile basis upon which universities, research centres, and practitioners may cooperate more closely in this key area. Last but not least, a further aim of the book is to present methodological approaches and experiences deriving from case studies and projects which aim to show how sustainability research may be implemented across a range of disciplines. Thanks to its scope and interdisciplinarity, this book makes an excellent reading to everyone interested in sustainability research. *Research Methods for Education*
