CCPS (Center for Chemical Process Safety), 2010-08-13 Powders and bulk solids handled widely in the chemical, pharmaceutical, agriculture, smelting, and other industries present unique fire, explosion, and toxicity hazards. Indeed, substances which are practically inert in consolidated form may become quite hazardous when converted to powders and granules. The U.S. Chemical Safety and Hazard Investigation Board is currently investigating dust explosions that occurred in 2003 at WestPharma CTA Acoustics and Hayes Lemmerz and is likely to recommend that companies that handle powders or whose operations produce dust pay more attention to understanding the hazards that may exist at their facility. This new CCPS guidelines book will discuss the types of hazards that can occur in a wide range of process equipment and with a wide range of substances and will present measures to address these hazards. **Eco-Sonic Media** Jacob Smith, 2015-06-05

The negative environmental effects of media culture are not often acknowledged; the fuel required to keep huge server farms in operation, landfills full of high-tech junk, and the extraction of rare minerals for devices reliant on them are just some of the hidden costs of the contemporary mediascape. Eco-Sonic Media brings an ecological critique to the history of sound media technologies in order to amplify the environmental undertones in sound studies and turn up the audio in discussions of greening the media. By looking at early and neglected forms of sound technology, Jacob Smith seeks to create a revisionist

ecologically aware history of sound media Delving into the history of pre electronic media like hand cranked gramophones comparatively eco friendly media artifacts such as the shellac discs that preceded the use of petroleum based vinyl early forms of portable technology like divining rods and even the use of songbirds as domestic music machines Smith builds a scaffolding of historical case studies to demonstrate how green media archaeology can make sound studies vibrate at an ecological frequency while opening the ears of eco criticism Throughout this eye opening and timely book he makes readers more aware of the costs and consequences of their personal media consumption by prompting comparisons with non digital non electronic technologies and by offering different ways in which sound media can become eco sonic media In the process he forges interdisciplinary connections opens new avenues of research and poses fresh theoretical questions for scholars and students of media sound studies and contemporary environmental history

Thomas,2018-09-22 Archaeological heritage legislation aims to ensure the best possible protection for the archaeological
heritage yet it remains the case that legislation can remain ineffective through other practical considerations Some
consideration may be legal or procedural such as difficulties in enforcing legislation or in preventing crimes or damage or
archaeological monuments However other problems may be less obvious and harder to address and require solutions which
go much further than the simple application of the law The aim of this volume is to address several issues surrounding the
management of archaeological heritage comparing and contrasting which laws work and which ones do not and ignoring
other issues which might effectively present the transplantation of an ideal system to another country or political climate Or
the cultural attitudes which might prevent a law working in the legal system for which it was designed The contributions are
