

The Beautiful Moon

Have you ever dreamed of going to the moon? In July 1969, two American astronauts walked on the moon. Their names were Neil Armstrong and Buzz Aldrin. If you visited the moon today, you would still be able to see their footprints! They also left behind the American flag.

When the astronauts went to the moon, they needed to wear spacesuits and helmets to protect them, because sometimes the moon is very cold and at other times it is very hot. The helmets helped them breathe because there is no air on the moon.

Did you know that if you weighed 70 pounds on Earth, you would weigh only 11 ½ pounds on the moon? And if you went for a walk on the moon, you would bounce with each step. Some people say the moon is made out of Swiss cheese because there are holes, called craters, on the moon. The craters were caused by large rocks from space, called meteorites, hitting the moon. Here is another interesting thing about the moon: Did you know that the moon is like a mirror? It reflects the light of the sun and sends it to Earth and makes the moon look bright and beautiful! Don't you agree we have a beautiful moon?
