Genes such as MTHFR, DHFR, COMT, MAO, MTR, MTRR, GAD, and DDC are a vital part of your genetic make up that provides an essential balance to how you feel mentally. How well these genes and many other genes function can mean the difference between having a happy life and suffering from anxiety, panic attacks, depression, OCD, and psychosis. When you have a genetic mutation in any of these genes, you may have a reduced ability to produce the right balance of neurotransmitters that are essential to good health. Understanding your mental health genes, how they work, and how they can affect your health is now more vital than ever as we see a large percentage of the population now suffering from mutations in these genes which has resulted in literally millions of mental health problems largely overlooked by medical professionals. If you are trying to solve a mental health problem and you are not factoring in genetics, you are missing 90% of the problem. This book is vital information for those that want to know why they have mental health symptoms and what they can do about it. But these genes don't work alone; they affect everyone differently depending on their own genetic makeup, so it is extremely important to look deeper into these genes for yourself and understand just how deeply they may be affecting your mental health, well-being, and how you can take actions that most mental health professionals don't even know are possible to restore your mental health at a genetic level. *Essentials of Genetics* Pragma Khanna, 2013-12-30 Covers the classical and molecular fields of genetics to enable students to form an integrated overview of genetic principles. The chapters are descriptive, explicit, and provided with relevant material that provides a logical transition of classical genetics into modern genetics. *Essential Genetics* Daniel L. Hartl, 2014 This book provides an introduction to modern genetics. Genetics Benjamin A. Pierce, 2008 Third edition of *Genetics: A Conceptual Approach* includes thorough streamlining of the entire text to focus on core concepts. **Instructor's Guide to Text and Media [for] Essential Biology** Edward J.
