Robinson, Helena P. Osana, Donna Kotsopoulos, 2019-05-07. This book explores mathematical learning and cognition in early childhood from interdisciplinary perspectives including developmental psychology, neuroscience, cognitive psychology, and education. It examines how infants and young children develop numerical and mathematical skills, why some children struggle to acquire basic abilities, and how parents, caregivers, and early childhood educators can promote early mathematical development. The first section of the book focuses on infancy and toddlerhood with a particular emphasis on the home environment and how parents can foster early mathematical skills to prepare their children for formal schooling. The second section examines topics in preschool and kindergarten such as the development of counting procedures and principles, the use of mathematics manipulatives in instruction, and the impacts of early intervention. The final part of the book focuses on particular instructional approaches in the elementary school years such as different additive concepts, schema-based instruction, and methods of division. Chapters analyze the ways children learn to think about work with and master the language of mathematical concepts as well as provide effective approaches to screening and intervention. Included among the topics: The relationship between early gender differences and future mathematical learning and participation; The connection between mathematical and computational thinking; Patterning abilities in young children; Supporting children with learning difficulties and intellectual disabilities; The effectiveness of tablets as elementary mathematics education tools. *Mathematical Learning and Cognition in Early Childhood* is an essential resource for researchers, graduate students, and professionals in infancy and early childhood development, child and school psychology, neuroscience, mathematics education, educational psychology, and

Graeber, Linda Valli, Kristie Jones Newton, 2011-07-16 Engaging students in worthwhile learning requires more than a knowledge of underlying principles of good teaching It demands considerable practice as well as images of what good teaching in particular situations and for particular purposes might look like This volume provides these images These cases were written from authentic unrehearsed lessons taught by upper elementary classroom teachers to diverse groups of real students in intact classrooms Each lesson contains elements of sound instructional practice from which both preservice and in service teachers can benefit Cases are not meant to be ideal but rather to evoke ways of seeing and thinking about good classroom instruction for all learners Accompanied by analytic commentaries from experts representing a particular perspective such as special education and ESOL these unrehearsed cases are written with the understanding that teaching is complex and multi dimensional The cases are drawn from a four year study of 4th and 5th grade mathematics instruction of culturally diverse classrooms with relatively high rates of students from low income families Making Math Stick David

Costello,2021-04-09 This remarkable book shows teachers how to stop working harder and start working smarter It describes a shift from teach test move on to teach connect apply to optimize student learning This valuable resource provides teachers with an understanding of simple manageable and sustainable strategies to change their approach immediately These strategies build on helping students retain math concepts so they can apply them in novel situations down the road The focus is on supporting teachers in framing instruction so that students strengthen their understanding and can remember and apply learning Making Math Stick is a game changer that champions durable learning for all students *Power Up Blended Learning* Catlin R. Tucker,2018-08-17 This book provides an actionable framework for leaders looking to implement a long term professional learning plan that extends professional development beyond a handful of days each year to create a coaching culture that supports teachers as they move toward blended learning Blended learning expert Catlin Tucker provides tools and resources for embedding professional learning into your school s culture including Coaching protocols Templates for feedback Lesson planning resources for blended learning Rubrics for evaluation Stories and tips from blended learning coaches Vignettes from teachers who have successfully shifted to a blended learning model Reflection questions for leading book studies
