The Mathematics Program Improvement Review Ron Pelfrey, 2006 How good is your school's mathematics program? Test scores can provide some general trend information but what you and your students' parents really need are specifics about the quality of the curriculum, the effectiveness of the instruction, and the school's overall capacity to support mathematics learning. The Mathematics Program Improvement Review (MPIR) is a proven evaluation process focused on standards for high quality mathematics programs in grades K-12. Based on research into effective program evaluation methods, the MPIR approach uses multiple data sources to clarify exactly what is working within an individual school's math program and what is not. Author and MPIR developer Ron Pelfrey has used this process to evaluate mathematics programs in more than 300 rural, urban, and suburban schools and has trained hundreds of educators to conduct reviews. Now this handbook makes the MPIR process and its benefits available to everyone. Inside you'll find guidelines for training review team members and all the materials needed to conduct a review, including Lists of standards and indicators for the 10 essential components of an effective mathematics program, Templates for questionnaires, interviews, and classroom observations, Detailed evaluation rubrics, Forms for compiling ratings and generating a final report. Whether used as a basis for informal faculty or departmental discussion to promote best practices in a particular area, such as curriculum or instruction, or to guide a formal program evaluation, this book will help any school or district apply MPIR tools and procedures to bring about positive change in students' mathematics learning.

From Mandate to Achievement Elaine Makas, 2009-09-14 This engaging book will guide your journey through the morass of curriculum alignment, development, and assessment. Our school struggled through missteps in curriculum alignment and implementing common assessments without the benefit of Makas' wisdom and experience. I highly recommend this book for teachers, administrators, and interested parents. Robert A. Martin, Leadership Consultant, Oakland Schools, Waterford, MI. Raise schoolwide performance with a systematic teacher-driven approach to curriculum development. Purposeful curriculum design is essential to attaining consistent academic improvement. Educators often find, however, that a viable curriculum based on mandated standards can be exceedingly challenging to create, implement, and sustain. In this book, curriculum consultant Elaine Makas provides a step-by-step guide to establishing the processes and documents necessary to build a stable, cohesive curriculum system that aligns to educational benchmarks. Based on the DAILY model (Data Alignment
