Diverse learners with exceptional needs require a specialized curriculum that will help them to develop socially and intellectually in a way that traditional pedagogical practice is unable to fulfill. As educational technologies and theoretical approaches to learning continue to advance, so do the opportunities for exceptional children. *Special and Gifted Education: Concepts, Methodologies, Tools, and Applications* is an exhaustive compilation of emerging research, theoretical concepts, and real world examples of the ways in which the education of special needs and exceptional children is evolving. Emphasizing pedagogical innovation and new ways of looking at contemporary educational practice, this multi-volume reference work is ideal for inclusion in academic libraries for use by pre-service and in-service teachers, graduate level students, researchers, and educational software designers and developers.

**Mobile Interactions in Context** Jesper Kjeldskov, 2022-05-31

This book presents a contextual approach to designing contemporary interactive mobile computer systems as integral parts of ubiquitous computing environments. Interactive mobile systems, services, and devices have become functional design objects that we care deeply about. Although their look, feel, and features impact our everyday lives as we orchestrate them in concert with a plethora of other computing technologies, these artifacts are not well understood or created through traditional methods of user-centered design and usability engineering. Contrary to more traditional IT artifacts, they constitute holistic user experiences of value and pleasure that require careful attention to the variety, complexity, and dynamics of their usage. Hence, the design of mobile interactions proposed in this book transcends existing approaches by using the ensemble of form and context as its central unit of analysis. As such, it promotes a designerly way of achieving convergence between form and context through a contextually grounded wholeness-sensitive and continually unfolding process of design.

User-Centered Interaction Design Patterns for Interactive Digital Television Applications Tibor Kunert, 2009-06-12

Technology is meant to make life easier and to raise its quality. Our interaction with technology should be designed according to human needs instead of us being required to adapt to technology. Even so, technology may change quickly, and people and

their habits change slowly With the aim of supporting user acceptance of iTV the focus of this book is on the usability of iTV applications A method for developing interaction design patterns especially for new technologies is presented for the first time The main characteristics covered in this new approach are systematic identification of recurrent design problems usability as a quality criterion for design solutions integration of designers into the pattern development process including identification of designers needs and iterative evaluation and optimisation of patterns to encourage designers to accept and use them usability testing to identify proven design solutions and their trade offs presentation of specific design guidelines

Kirschner, Rob L. Martens, 2006-04-11 A Dutch policy scientist once said the information and knowledge in the twenty first century has the shelf life of fresh fish and learning in this age often means learning where and how to find something and how to relate it to a specific situation instead of knowing everything one needs to know On top of this the world has become so highly interconnected that we have come to realise that every decision that we make can have repercussions somewhere else To touch as many bases as possible we need to work with knowledgeable others from different fields multiple agents and take heed of their points of view multiple representations To do this we make increasing use of computers and computer mediated communication If computer supported collaborative learning CSCL is not simply a newly discovered hype in education what is it and why are we writing a book about it Dissecting the phrase into its constituent parts we see that first of all CSCL is about learning and in the twenty first century this usually means constructivist learning **Interaction Design** Jenny Preece, Yvonne Rogers, Helen Sharp, 2002-02-08 The authors present an up to date exposition of the design of the current and next generation interactive technologies such as the Web mobiles and wearables
