Wright,Cynthia S Sunal,Elizabeth K. Wilson,2006-01-01 Our goal with this book Research on Enhancing the Interactivity of Online Learning is to present a juried scholarly and accessible review of research theory and or policy on specific issues of interactive online learning for K 16 educators administrators and students of online learning Online learning has become the norm rather than the exception for many of today s students Instructors are more willing to explore online learning options students are enrolling in record numbers and colleges as well as many K 12 institutions are offering more online courses As educators we have more tools than ever to ensure online course success but just as with a traditional class we must continue to place emphasis on good pedagogy To achieve good pedagogy online teaching takes additional time and a restructuring of course content by the instructor Student issues include coping strategies ease of navigation skills required to complete the course availability of online resources feedback from the instructor and collaborative interactive learning opportunities Principles of interactive online learning are new to many and this book

provides a forum for interactive online learning research while also including ideas that enhance both the practical and theoretical aspects of interactive online learning The editors have included chapters that can further knowledge and understanding of emerging trends and foster debate regarding issues that surround interactive online learning *Teaching and Learning at a Distance* Michael Simonson,Susan Zvacek,2024-01-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to design courses evaluate programs and identify issues and trends affecting the field In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book and has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book is the importance of research to the development of effective courses and programs offered at a distance The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational Research asserting that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors do not make the claim that education delivered at a distance is inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more Equivalency theory is the fourth theme of the book Here we present the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It can serve as a stand alone source of information *ICEL 2018 13th International Conference on e-Learning* Professor Eunice Ivala,2018-07-05 *Psychology* Don H.
