REIC Memorandum Battelle Memorial Institute. Radiation Effects Information Center, 1961 **Spacecraft Dynamics and Control** Enrico Canuto, Carlo Novara, Donato Carlucci, Carlos Perez-Montenegro, Luca Massotti, 2018-03-08 Spacecraft Dynamics and Control The Embedded Model Control Approach provides a uniform and systematic way of approaching space engineering control problems from the standpoint of model based control using state space equations as the key paradigm for simulation design and implementation The book introduces the Embedded Model Control methodology for the design and implementation of attitude and orbit control systems The logic architecture is organized around the embedded model of the spacecraft and its surrounding environment The model is compelled to include disturbance dynamics as a repository of the uncertainty that the control law must reject to meet attitude and orbit requirements within the uncertainty class The source of the real time uncertainty estimation prediction is the model error signal as it encodes the residual discrepancies between spacecraft measurements and model output The embedded model and the uncertainty estimation feedback noise estimator in the book constitute the state predictor feeding the control law Asymptotic pole placement exploiting the asymptotes of closed loop transfer functions is the way to design and tune feedback loops around the embedded model state predictor control law reference generator The design versus the uncertainty class is driven by analytic stability and performance inequalities The method is applied to several attitude and orbit control problems The book begins with an extensive introduction to attitude geometry and algebra and ends with the core themes state space dynamics and Embedded Model Control Fundamentals of orbit attitude and environment dynamics are treated giving emphasis to state space formulation disturbance dynamics state feedback and prediction closed loop stability Sensors and actuators are treated giving emphasis to their dynamics and modelling of measurement errors Numerical tables are included and their data employed for numerical simulations Orbit and attitude control problems of the European GOCE mission are the inspiration of numerical exercises and simulations The suite of the attitude control modes of a GOCE like mission is designed and simulated around the so called mission state predictor Solved and unsolved exercises are included within the text and not separated at the end of chapters for better understanding training and application Simulated results and their graphical plots are developed through MATLAB Simulink code

recordings from audiovisual archives The Handbook provides a dynamic and richly layered collection of stories and critical questions for anyone engaged or interested in repatriation or archival work Repatriation often is overtly guided by an ethical mandate to return something to where it belongs by such means as working to provide reconnection and Indigenous control and access to cultural materials Essential as these mandates can be this remarkable volume reveals dimensions to repatriation beyond those which can be understood as simple acts of giving back or returning an archive to its homeland Musical repatriation can entail subjective negotiations involving living subjects intangible elements of cultural heritage and complex histories situated in intersecting webs of power relations and manifold other contexts The forty eight expert authors of this book s thirty eight chapters engage with multifaceted aspects of musical repatriation situating it as a concept encompassing widely ranging modes of cultural work that can be both profoundly interdisciplinary and embedded at the core of ethnographic and historical scholarship These authors explore a rich variety of these processes many streams making the volume a compelling space for critical analysis of musical repatriation and its wider significance The Handbook presents these chapters in a way that offers numerous emergent perspectives depending on one s chosen trajectory through the volume From retracing the paths of archived collections to exploring memory performance research goals institutional power curation preservation pedagogy and method media and transmission digital rights and access policy and privilege intellectual property ideology and the evolving institutional norms that have marked the preservation and ownership of musical archives The Oxford Handbook of Musical Repatriation addresses these key topics and more in a deep richly detailed and diverse exploration [A History of UNESCO](#) Poul Duedahl,2016-04-12 The mission UNESCO as defined just after the end of World War II is to build the defenses of peace in the minds of men In this book historians trace the routes of selected UNESCO mental engineering initiatives from its headquarters in Paris to the member states to assess UNESCO s global impact

Half-Life Frank Close,2015-02-03 It was at the height of the Cold War in the summer of 1950 when Bruno Pontecorvo mysteriously vanished behind the Iron Curtain Who was he and what caused him to disappear Was he simply a physicist or also a spy and communist radical A protege of Enrico Fermi Pontecorvo was one of the most promising nuclear physicists in the world He spent years hunting for the Higgs boson of his day the neutrino a nearly massless particle thought to be essential to the process of particle decay His work on the Manhattan Project helped to usher in the nuclear age and confirmed his reputation as a brilliant physicist Why then would he disappear as he stood on the cusp of true greatness perhaps even the Nobel Prize In Half Life physicist and historian Frank Close offers a heretofore untold history of Pontecorvo s life based on unprecedented access to Pontecorvo s friends and family and the Russian scientists with whom he would later work Close takes a microscope to Pontecorvo s life combining a thorough biography of one of the most important scientists of the twentieth century with the drama of Cold War espionage With all the elements of a Cold War thriller classified atomic research an infamous double agent a possible kidnapping by Soviet operatives Half Life is a history of nuclear physics at

The Lab Book Darren Wershler,Lori Emerson,Jussi Parikka,2022-03-22 An important new approach to the study of laboratories presenting a practical method for understanding labs in all walks of life From the Big Science of Bell Laboratories to the esoteric world of science chambers to university media labs to neighborhood makerspaces places we call labs are everywhere but how exactly do we account for the wide variety of ways that they produce knowledge More than imitations of science and engineering labs many contemporary labs are hybrid forms that require a new methodological and theoretical toolkit to describe The Lab Book investigates these vital creative spaces presenting readers with the concept of the hybrid lab and offering an extended and rare critical investigation of how labs have proliferated throughout culture Organized by interpretive categories such as space infrastructure and imaginaries The Lab Book uses both historical and contemporary examples to show how laboratories have become fundamentally connected to changes in the contemporary university Its wide reach includes institutions like the MIT Media Lab the Tuskegee Institute's Jesup Wagon ACTLab and the Media Archaeological Fundus The authors cover topics such as the evolution and delineation of lab based communities how labs tools and technologies contribute to defining their space and a glossary of key hybrid lab techniques Providing rich historical breadth and depth The Lab Book brings into focus a critical but often misunderstood aspect of the contemporary arts and humanities

Militarizing the Environment Robert P. Marzec,2015-12-21 As the seriousness of climate change becomes more and more obvious military institutions are responding by taking a prominent role in the governing of environmental concerns engaging in climate change war games and preparing for the effects of climate change from conflicts due to loss of food water and energy to the mass migration of millions of people displaced by rising sea levels This combat oriented stance stems from a self destructive pattern of thought that Robert P Marzec names environmentality an attitude that has been affecting human environmental relations since the seventeenth century Militarizing the Environment traces the rise of this influential mindset in America and other nations that threatens to supplant ideas of sustainability with demands for adaptation In this extensive historical study of scientific military political and economic formations across five centuries

Marzec reveals how environmentality has been instrumental in the development of today's security society informing the creation of the military industrial complex during World War II and the National Security Act that established the CIA during the Cold War. Now embedded in contemporary Western thought, environmentality has even infiltrated scientific thinking transforming Darwinian insights into a quasi-theology that makes security the biological basis of existence. Marzec exposes the self-destructive nature of this increasingly accepted worldview and offers alternatives that counter the blind alleys of national and global security.

Vaccinating Britain Gareth Millward, 2019-01-29. This electronic version has been made available under a Creative Commons BY-NC-ND open access license. This book is available as an open access ebook under a CC BY-NC-ND licence. *Vaccinating Britain* shows how the British public has played a central role in the development of vaccination policy since the Second World War. It explores the relationship between the public and public health through five key vaccines: diphtheria, smallpox, poliomyelitis, whooping cough, and measles, mumps, rubella (MMR). It reveals that while the British public has embraced vaccination as a safe, effective, and cost-efficient form of preventative medicine, demand for vaccination and trust in the authorities that provide it has ebbed and flowed according to historical circumstances. It is the first book to offer a long-term perspective on vaccination across different vaccine types. This history provides context for students and researchers interested in present-day controversies surrounding public health immunisation programmes. Historians of the post-war British welfare state will find valuable insight into changing public attitudes towards institutions of government and vice versa.

Beneath the Night Stuart Clark, 2020-09-29. From stone age to space age, every human who has looked up at the night sky has seen the same stars in the same patterns. They reveal our entire history as well as hinting at our ultimate fate. In *Beneath the Night*, Stuart Clark tells the full story of this relationship. From prehistoric cave art and Ancient Egyptian zodiacs to the modern era of satellites and space exploration, Clark reveals the history of a fascination that has shaped our scientific understanding, helped us navigate the terrestrial world, provided inspiration for our poets, artists, and philosophers, and given us a place to project our hopes and fears. This is the story of the universe and our place within it.

Dalla pirateria dei libri all'editoria predatoria Rossana Morriello, 2023-02-07. Opinione diffusa che alcune delle problematiche che caratterizzano l'odierna comunicazione scientifica abbiano radici recenti. Non di rado si considerano questioni quali l'editoria predatoria o gli episodi di violazione di etica e integrità della ricerca come conseguenza della diffusione dell'editoria digitale, soprattutto ad accesso aperto. In realtà, sebbene l'open access possa in certe condizioni aumentare il rischio di incorrere in comportamenti illeciti o eticamente scorretti, rendere accessibili liberamente i risultati della ricerca accresce la visibilità e la circolazione delle pubblicazioni. Non solo: si agevola anche il rilevamento dei casi di distorsione che altrimenti sarebbero più difficili da individuare. Fenomeni quali le riviste e le conferenze predatorie, i paper mills che fabbricano articoli scientifici, gli zombie papers che risorgono dalle ceneri della malascienza e le molte altre criticità relative all'etica e all'integrità della ricerca scientifica sono in aumento, ma al contempo sono divenute più evidenti grazie alle

potenzialit delle tecnologie Il libro traccia e descrive le pratiche dannose nella comunicazione scientifica che oggi ne minano la credibilit ma getta anche lo sguardo indietro per mettere in luce le linee di continuit con quanto accaduto nei secoli passati L intreccio tra le vicende di storia della stampa le sollecitazioni della pirateria libraria e il dibattito sulla libert intellettuale che condusse alla nascita della prima legge sul copyright e infervor gli illuministi torna ad essere cruciale ai nostri giorni configurandosi come un probabile stato di transizione verso un nuovo paradigma *Fuzzy Mathematics* Etienne E.
