Harmonies Of The World:

The Harmony of the World Johannes Kepler, 1997 The authors have presented and interpreted Johannes Kepler's Latin text to English readers by putting it into the kind of clear but earnest language they suppose Kepler would have used if he had been writing today

Harmonies of the World Johannes Kepler, 2020-09-28 [The Harmonies of the World](#) Johannes Kepler, 1939 *Harmonies of the World* Johannes Kepler, 2002 [Epitome of Copernican Astronomy and Harmonies of the World](#) Johannes Kepler, 2012-07-03 The brilliant German mathematician Johannes Kepler 1571-1630 one of the founders of modern astronomy revolutionized the Copernican heliocentric theory of the universe with his three laws of motion that the planets move not in circular but elliptical orbits that their speed is greatest when nearest the sun and that the sun and planets form an integrated system This volume contains two of his most important works The Epitome of Copernican Astronomy books 4 and 5 of which are translated here is a textbook of Copernican science remarkable for the prominence given to physical astronomy and for the extension to the Jovian system of the laws recently discovered to regulate the motions of the Planets Harmonies of the World book 5 of which is translated here expounds an elaborate system of celestial harmonies depending on the varying velocities of the planets

Metaphysics of Goodness Robert Cummings Neville, 2019-10-15 Develops a theory of culture based on a metaphysics that elaborates on the Platonic and Confucian traditions In *Metaphysics of Goodness* Robert Cummings Neville extends Alfred North Whitehead's project of cultural studies which was based on a new metaphysics that Whitehead developed in *Adventures of Ideas* Neville's focus is value or goodness in many modes The metaphysics treated in this book derive from the Platonic and Confucian traditions with significant modifications of Whitehead Peirce Dewey Confucius Xunzi and Zhou Dunyi Part one develops a theory of form based on a metaphysics of harmony Part two elaborates a theory of art based on a metaphysics of beauty Part three sketches a theory of personhood based on a metaphysics of obligation Part four discusses civilization in a systematic way based on a metaphysics of flourishing Throughout the book Neville elaborates a theory of interpretation that is inspired by Peirce Dewey and Xunzi but is not limited to their ideas While the reasoning of the book is concise it employs methodologies from many kinds of philosophy art criticism ethics and cultural studies and sees philosophy as needing to learn from all these disciplines Neville's work is informed by a lifelong engagement with the most important philosophers in history including Plato Aristotle Whitehead and Dewey Here he offers an important argument that there is beauty not only in how people see the world but also in the world itself Kevin Schilbrack Appalachian State University

Beyond Sovereign Territory Thom Kuehls, 1996 How should we think about politics in a world where ecological problems from the deforestation of the Amazon to acid rain transcend national boundaries This is the timely and important question addressed by Thom Kuehls in *Beyond Sovereign Territory* Contending that the sovereign territorial state is not adequate to contain or describe the boundaries of ecopolitics the author reorients our thinking about government nature and politics Kuehls argues that changes in technology and the

scope of governmental aims have rendered conventional ecological and internationalist aims anachronistic and ultimately ineffective in the face of impending environmental collapse He questions the process by which land is transformed into an object of sovereignty into territory demonstrating how representations of political space that are premised on territorial sovereignty fail to come to terms with much of what is involved in ecopolitics Ultimately Kuehls critiques an orientation that privileges a certain utilitarian relationship between humans and nonhuman nature one in which the earth is largely interpreted as given to humans Deeply humanistic and challenging conventional wisdom Beyond Sovereign Territory will be of interest to readers of environmental politics geography international politics and political theory *Slow Movies* Ira Jaffe, 2014-05-14 In all film there is the desire to capture the motion of life to refuse immobility Agnes Varda has noted But to capture the reality of human experience cinema must fasten on stillness and inaction as much as motion *Slow Movies* investigates movies by acclaimed international directors who in the past three decades have challenged mainstream cinema's reliance on motion and action More than other realist art cinema slow movies by Lisandro Alonso Nuri Bilge Ceylan Pedro Costa Jia Zhangke Abbas Kiarostami Cristian Mungiu Alexander Sokurov Bela Tarr Gus Van Sant and others radically adhere to space times in which emotion is repressed along with motion editing and dialogue yield to stasis and contemplation action surrenders to emptiness if not death Planetary Motions Norriss S. Hetherington, 2006-07-30 Students in an introductory physics class learn a variety of different and seemingly unconnected concepts Gravity the laws of motion forces and fields the mathematical nature of the science all of these are ideas that play a central role in understanding physics And one thing that connects all of these physical concepts is the impetus the great scientists of the past had to develop them the desire to understand the motion of the planets of the solar system This desire led to the revolutionary work of Copernicus and Galileo Kepler and Newton And their work forever altered how science is practiced and understood *Experiencing Sound* Lawrence Kramer, 2024-09-03 From the winds of Mars to a baby's first laugh a prolific philosopher composer reflects on the profound imperative of sound in everyday life *Experiencing Sound* presents its subject as fundamental to all experience sensation perception and understanding Lawrence Kramer turns on its head the widespread notion that vision takes pride of place among the senses and demonstrates how paying attention to sound can transform how we make meaning out of experience Through a series of brief lyrical forays Kramer shows that sound whether heard or unheard is the object of a primary need and an essential component in the sensation of being alive and the perception of time It is something that we may suffer or be made to suffer as well as enjoy Like its predecessor *The Hum of the World* this book ranges widely across music philosophy literature art media and history from classical antiquity to the present as it invites us to experience sound anew
