Subrahmanya Bhat,Tuan Anh Nguyen,2020-03-13 Fiber reinforced Nanocomposites Fundamentals and Applications explores
the fundamental concepts and emerging applications of fiber reinforced nanocomposites in the automobile aerospace
transportation construction sporting goods optics electronics acoustics and environmental sector In addition the book
provides a detailed overview of the properties of fiber reinforced nanocomposites including discussion on embedding these
high strength fibers in matrices Due to the mismatch in structure density strain and thermal expansion coefficients between
matrix and fibers their thermo mechanical properties strongly depend not only on the preparative methods but also on the
interaction between reinforcing phase and matrix phase This book offers a concise overview of these advances and how they
are leading to the creation of stronger more durable classes of nanocomposite materials Explores the interaction between
fiber nanoreinforcers and matrices at the nanoscale Shows how the properties of fiber enforced nanocomposites are ideal for
use for a variety of consumer products Outlines the major challenges to creating fiber reinforced nanocomposites effectively
