Strategies With Whole Numbers John J. SanGiovanni,Jennifer M. Bay-Williams,Susie Katt,2024-03-22 Because fluency practice is not a worksheet Fluency in mathematics is more than basic facts or using algorithms It is not about recall or speed Real fluency is about choosing strategies that are efficient flexible lead to accurate solutions and are appropriate for the given situation Developing fluency is a matter of equity and access for all learners The landmark book Figuring Out

Fluency in Mathematics Teaching and Learning offered educators the inspiration to develop a deeper understanding of procedural fluency. It explained the seven Significant Strategies for fluency and offered a plethora of pragmatic tools for shifting classrooms toward a greater fluency approach. However, in order to become truly adept with these strategies, children must first have certain underlying foundational concepts and skills in place.

Figuring Out Fluency: Ten Underlying Foundations for Reasoning Strategies with Whole Numbers explores the ideas that are essential to reasoning. Number Relationships, Subitizing and Decomposing, Distance to 10, 100 and 1 000, Counting and Skip Counting, Properties of Addition and Its Inverse Relationship with Subtraction, Properties of Multiplication and Its Inverse Relationship with Division, Multiplying by 10s and 100s, Multiples and Factors, Doubling and Halving, and Computational Estimation. With this book, elementary teachers can help children develop these foundational understandings critical to reasoning and number sense. Leverage over 100 classroom-ready routines, centers, and games to develop these concepts both in first instruction practice and intervention. Download all of the needed support tools, game boards, and other resources from the companion website for immediate implementation. Develop each and every student's knowledge and power to become skilled and confident mathematical thinkers and doers.

Math & Reading Workbook, Grade 1, 2014-01-02. The Master Skills workbook series provides comprehensive practice in reading comprehension and math for students in grades K-3. Short activities with bright illustrations are fun to do. Both parents and students will like the colorful, engaging pages that target essential skills for school success.

Scaling Your Social Venture P. Bloom, 2017-07-01. Provides practicing social entrepreneurs, whether nonprofit or for-profit, with a guiding framework and practical recommendations for scaling. It is filled with ideas and examples to make it easier for practitioners to make major strides in resolving serious social problems involving poverty, health, education, and the environment.

Emerging Technologies to Promote and Evaluate Physical Activity Dan J. Graham, James Aaron Hipp, Simon Marshall, Jacqueline Kerr, 2014-10-23. Increasingly, efforts to promote and measure physical activity are achieving greater precision, greater ease of use, and/or greater scope by incorporating emerging technologies. This is significant for physical activity promotion because more precise measurement will allow investigators to better understand where, when, and how physical activity is and is not occurring, thus enabling more effective targeting of particular behavior settings. Emerging technologies associated with the measurement and evaluation of physical activity are noteworthy because:

1. Their ease of use and transferability can greatly increase the external validity of measures and findings.
2. Technologies can significantly increase the ability to analyze patterns.
3. They can improve the ongoing systematic collection and analysis of public health surveillance due to real-time capabilities associated with many emerging technologies.
4. There is a need for research and papers about the cyberinfrastructure required to cope with big data, multiple streams, processing, aggregation, visualization, etc.
5. Increasingly blurred boundaries between measurement and intervention activity. e.g., the quantified self, self-tracking, movement may necessitate a reevaluation of the conventional scientific model for designing and evaluating

these sorts of studies There have been many recent disparate advances related to this topic Advances such as crowdsourcing allow for input from large diverse audiences that can help to identify and improve infrastructure for activity e g large group identification of environmental features that are conducive or inhibiting to physical activity on a national and even global scale Technologies such as Global Positioning Systems GPS and accelerometry are now available in many mobile phones and can be used for identifying and promoting activity and also understanding naturalistically occurring activity SenseCam and other personal visual devices and mobile apps provide person point of view context to physical activity lifestyle and timing Further multiple sensor systems are enabling better identification of types of activities like stair climbing and jumping that could not previously be identified readily using objective measures like pedometers or accelerometers in isolation The ability of activity sensors to send data to remote servers allows for the incorporation of online technology e g employing an online social network as a source of inspiration or accountability to achieve physical activity goals and websites such as Stickk com enable individuals to make public contracts visible to other users and also incorporates financial incentives and disincentives in order to promote behaviors including physical activity In addition the increasing use of active gaming e g Wii XBox Kinect in homes schools and other venues further underscores the growing link between technology and physical activity Improvements in mathematical models and computer algorithms also allow greater capacity for classifying and evaluating physical activity improving consistency across research studies Emerging technologies in the promotion and evaluation of physical activity is a significant area of interest because of its ability to greatly increase the amount and quality of global recorded measurements of PA patterns and its potential to more effectively promote PA Emerging technologies related to physical activity build on our own and others interdisciplinary collaborations in employing technology to address public health challenges This research area is innovative in that it uses emerging resources including social media crowdsourcing and online gaming to better understand patterns of physical activity
