Global Burden and Challenges of Melioidosis Direk Limmathurtsakul, David AB Dance, 2019-03-26 This book is the definitive reference regarding the global status of melioidosis in 2018 Melioidosis is one of the most neglected tropical diseases NTDs so much so that it is not even included in the WHO list of NTDs Yet modeling suggests that it kills more people worldwide every year than diseases that are much better known such as leptospirosis and dengue The reasons for this under recognition are numerous including the fact that it mainly affects the disadvantaged rural poor in areas that are poorly supplied with the diagnostic capability to

make the diagnosis In 22 separate articles expert authors from around the world have summarized what is known about the burden of the disease in humans and animals and the presence of the causative bacterium in the environment in their countries or regions They have also identified the main obstacles and challenges to establishing the true burden and to ensure that patients receive accurate diagnosis and optimal care for this all too frequently fatal disease Rather than focusing on the theoretical risk of the use of *Burkholderia pseudomallei* as a biological weapon this book highlights its importance as a clear and present danger to global public health **Comparative Cataloguing-rules ...** Theresa Hitchler,1903

Nanoelectronic Materials, Devices and Modeling Qiliang Li,Hao Zhu,2019-07-15 As CMOS scaling is approaching the fundamental physical limits a wide range of new nanoelectronic materials and devices have been proposed and explored to extend and or replace the current electronic devices and circuits so as to maintain progress with respect to speed and integration density The major limitations including low carrier mobility degraded subthreshold slope and heat dissipation have become more challenging to address as the size of silicon based metal oxide semiconductor field effect transistors MOSFETs has decreased to nanometers while device integration density has increased This book aims to present technical approaches that address the need for new nanoelectronic materials and devices The focus is on new concepts and knowledge in nanoscience and nanotechnology for applications in logic memory sensors photonics and renewable energy This research on nanoelectronic materials and devices will be instructive in finding solutions to address the challenges of current electronics in switching speed power consumption and heat dissipation and will be of great interest to academic society and the industry High Resolution Active Optical Remote Sensing Observations of Aerosols, Clouds and Aerosol-Cloud Interactions and Their Implication to Climate Simone Lolli,Kai Qin,James Campbell,Sheng-Hsiang (Carlo) Wang,2020-12-03

Remote Sensing is of paramount importance for Earth Observation to monitor and analyze the Earth's vital signs In this Special Issue are reported the latest research results involving active optical remote sensing instruments both from ground based to satellite platforms that are involved in analyzing the vertical and horizontal aerosol and cloud distribution other than their geometrical optical and microphysical properties Those active optical remote sensing techniques are also very useful in determining pollutant dispersion and the dynamics inside the boundary layer The published studies put in evidence the hidden mechanisms on how pollution from the source is advected transnationally in other countries and the interaction with local meteorology *Metastatic Progression and Tumour Heterogeneity* Fred Hollande,Delphine Merino,2021-01-21

Improved understanding of the cellular and molecular makeup of tumors in the last 30 years has unraveled a previously unexpected level of heterogeneity among tumor cells as well as within the tumor microenvironment The concept of tumor heterogeneity underlines the realization that different tumors can display significant differences in their genomic content as well as in their overall behavior Our capacity to better understand the heterogeneous make up of tumors has very important consequences on our ability to design efficient therapeutic strategies to improve patient survival This book highlights several

aspects of tumor heterogeneity in the context of metastatic development and summarize some of the challenges posed by heterogeneity for tumor diagnostics and therapeutic management of tumors **Guide to Reference in Genealogy and Biography** Mary K.
