Researching Race in Education Adrienne D. Dixon, 2014-06-01 In traditional educational research race is treated as merely a variable In 1995 Gloria Ladson Billings and William F Tate IV argued that race is under theorized in education and called for educational researchers to pay closer attention to the relationship between race and educational inequity Ladson Billings and Tate 1995 In particular they argued drawing on legal scholar Derrick Bell s notion of Racial Realism Bell 1995 that racialized inequities are not accidental or aberrant rather racialized educational inequities are the result of particular and specific policies and practices that are designed to maintain particular forms of dominance and marginalization More specifically Bell and later Ladson Billings and Tate argue that racial inequity persists despite liberal policies and legislation that were ostensibly designed to eradicate it The Racial Realist perspective takes into the consideration the longevity and history of racism racial inequity and White supremacy in the U S and serves as a mirror to reflect back the limitations of proposed policies and legislation that fail to address those issues In this way Critical Race Theory and the scholars who draw on CRT view our work as an important check and balance in the effort toward racial equality

Teachers Can Be Financially Fit

Tawni Hunt Ferrarini, M. Scott Niederjohn, Mark C. Schug, William C. Wood, 2020-08-11 This book uses relatable case studies to dispense practical financial advice to educators. Written by an expert team of four award-winning economics educators, the book provides an engaging narrative specifically designed for teachers and their unique financial needs. Educators are attracted to the teaching profession for numerous reasons. Prospective teachers enter the profession believing it offers a certain level of job security and good benefits, usually including a defined benefit state-funded pension. But things are changing. Pensions vary widely from state to state and even within school districts. Many private schools do not offer even basic 403(b) saving plans, and when they do, they are often not very generous. Much the same can be said of many charter schools and private colleges and universities. The book consists of fourteen chapters covering a comprehensive group of topics specifically curated for educators teaching at the K-12 and university level, including saving for retirement, managing debt, investment strategies, and real estate. Each chapter begins with a case study of an educator in a specific financial situation, which sets the scene for the introduction and explanation of key concepts. The chapters include a Q&A section to address common questions and conclude with a Financial 911 focusing on a financial emergency related to the chapter topic.

As Violet rises to popularity and steps into the life Olivia left unfinished, McKenna becomes convinced Olivia's death wasn't just a coincidence, especially when a ghost haunting her bedroom keeps leaving clues that point to Violet.
