Recognized Women: Carolina Esser, 2025-01-29 Axel Honneth's theory of recognition comes from a theoretical paradigm attached to Western deliberative democracy Honneth does not interpret recognition from the perspective of gender equality and how a woman may be recognized in non democratic and non Western societies If one interprets the theory of recognition with a focus on the situation of women it is possible to identify that legal recognition plays a fundamental role It is relevant then to propose forms of struggling for the recognition of these women It is adopted the methodology of Critical Theory and recognition is illustrated from the perspectives of case studies for instance regarding women in China and Morocco In these countries there are different forms of disrespect Nevertheless despite restrictions imposed by government and culture both countries still have forms of struggling for recognition that should be perceived Several forms of struggling for recognition to turn recognition into a universal institute which can be applied in different contexts There are always forms of struggling for better conditions of women's recognition in every community through the support of law Europe and Central Asia Economic Update, Fall 2021 World Bank, 2021-10-05 Although global economic activity is recovering and output in Europe and Central Asia ECA is expected to grow in 2021 containing COVID 19 remains a challenge in the region Enterprise survey data for the emerging and developing countries in the region show that COVID 19 had a profound and heterogeneous impact on firms Smaller younger and female run businesses were hit harder and had greater difficulty recovering But the crisis also played a cleansing role and economic activity in ECA appears to have been reallocated toward more productive firms during the crisis particularly in countries with more competitive markets Firms with high pre crisis labor productivity experienced significantly smaller drops in sales and employment than firms with low pre crisis labor productivity and were also more likely to adapt to the crisis by increasing online activity and remote work Many governments in ECA implemented broad policy support schemes to address the initial economic fallout from the crisis Overall this government support was more likely to go to less productive and larger firms regardless of the level of their pre crisis innovation As economies enter the economic recovery phase it will be important for policy makers in all countries to phase out broad policy support measures as soon as appropriate and focus on fostering a competitive business environment which is key to a strong recovery resilience to future crises and sustainable long term economic growth China Internet Development Report 2021 Publishing House of

official and unofficial forces and charts the development of the debate from an initially parochial concern with problems raised by Chinese practice to a grand critique of the theory of socialism itself She concludes with an enlightening comparison of the reassessments undertaken by Deng Xiaoping with those of Gorbachev linking them to the divergent outcomes of reform and revolution in their respective countries

Local Partnership & the Unemployment Crisis in Britain Chris Moore, J.J. Richardson, Jeremy Moon, 2024-09-18

Originally published in 1989, this study provides an informed and critical analysis of local partnerships between the private and public sectors in response to the unemployment problems. Until this book was published, there had been little objective analysis of the workings of the local partnership model with big business. This book assesses the contribution of local enterprise agencies and how they related to other dimensions of policy responses to unemployment. An important element of the analysis is a number of local case studies of established partnerships in different parts of the United Kingdom. The book discusses the factors that lead to effective local response in terms of organizational structures and networks and programmes of activity. It places local factors in a wider political and economic context in order to provide a realistic assessment of the motives and impact of policy actors.
