

Lesson Description

Lesson Title: The Magic School Bus Inside the Earth

Length: 75-minute block

Grade: 4

Lesson Description: For this lesson, we will start by reading the story The Magic School Bus Inside the Earth. Students will be introduced to geology by examining rocks and minerals, noting the characteristics and properties of them and learning how they were formed. As a class, we will discuss different types of rocks and how they differ, and where we would find them. Students would have been tasked the day before to bring in a few rocks they found around their community. Students will then be tasked with completing a worksheet where they will discuss their rock, its characteristics and properties, where they found it and how we believe it was made. To end this lesson students will be asked to bring their worksheets to the carpet to share (or to the teacher to share depending on the student). We will also discuss mining and manufacturing and how they relate to social studies.

By Science: Geology - Rocks and Minerals

Stage 1: Desired Results

Fundamental Concepts/Skills:

- Students will be able to differentiate between different types of rocks
- Students will use descriptive words and describe the characteristics of rocks
- Students will be able to complete a graphic organizer
- Students will understand the difference between reality and fantasy during the reading
- Students will practice writing sentences

Expectations

Science and Technology Curriculum - Understanding Earth and Space Systems Strand

Overall Expectations:

1. Investigate, test, and compare the physical properties of rocks and minerals.
2. Demonstrate an understanding of the physical properties of rocks and minerals.

Specific Expectations:

Developing Investigation and Communication Skills

- 2.2 Use a variety of tests to identify the physical properties of minerals
- 2.3 Use a variety of criteria to classify common rocks and minerals according to their characteristics
- 2.4 Use appropriate science and technology vocabulary, including hardware, colour, texture, and texture, to oral and written communication

Understanding Basic Concepts

- 3.1 Describe the difference between rocks and minerals, and explain how these differences determine how they are used
- 3.2 Describe the properties that are used to identify minerals
- 3.3 Describe how igneous, sedimentary, and metamorphic rocks are formed
- 3.4 Describe the characteristics of the three classes of rocks, and explain how their characteristics are related to their origin

Mathematics - Spatial Sense Strand (S)

Overall Expectations:

2. Measurement - compare, estimate, and determine measurements in various contexts
