Mitchell,2015-08-27 This book constitutes the refereed proceedings of the 18th International Conference on Information

Security ISC 2015 held in Trondheim Norway in September 2015 The 30 revised full papers presented were carefully reviewed and selected from 103 submissions The papers cover a wide range of topics in the area of cryptography and cryptanalysis and are organized in the following topical sections signatures system and software security block ciphers protocols network and cloud security encryption and fundamentals PUFs and implementation security and key generation biometrics and image security
