Engineering the Human Bert Jaap Koops, Christoph H. Lüthy, Annemiek Nelis, Carla Sieburgh, J.P.M. Jansen, Monika S. Schmid, 2013-02-12 The volume is collection of articles treating the topic of human improvement enhancement from a variety of perspectives philosophical literary medical genetic sociological legal etc The chapters in this volume treat not only those aspects that most immediately come to mind when one thinks of human enhancement such as genetic engineering cloning artificial implants and artificial intelligence etc Somewhat less obvious aspects include evolutionary perspectives in connection with the prolongation of the human lifespan plastic surgery since its beginnings and questions such as whether the distinction between natural and artificial can really be drawn at all and how it has been conceived across the ages or what the legal implications are of recent developments and techniques Many papers make links to the representation of these developments in popular culture from Jules Verne through Aldous Huxley to the movie Gattaca address the hopes and fears that come with them as well as the question how realistic these are While all chapters are written by scientists at the international top of their respective fields all are accessible to a non specialist audience and eminently readable We believe that they represent a state of the art overview of questions that are of interest to a large audience The book thus targets a non specialist audience with an interest in philosophical sociological scientific and legal issues involved in both traditional and recent matters concerning the desire of mankind to improve itself the human body the human mind and the human condition It is unique in that it brings together all these aspects within a coherent and cohesive collection

De-Sequencing Dana Mahr, Martina von Arx, 2020-12-07 Are you your genes De Sequencing Identity Work with Genes explores this perplexing question showing how different forms of knowledge must be contextualized to become meaningful It is generally assumed that the genomic sequence adds up to the identity forming material life is made of Yet identity cannot itself adopt the form of a sequence As the authors in this volume show the genome must be de sequenced by human language to render it interpretable and meaningful in a social context The book unpacks this type of sequence speech in engaging detail adopting a personal social cultural and bio political approach to examine the transformation of human identity and reflexivity in the era of genetic citizenship

Numerical Simulation, An Art of Prediction, Volume 2 Jean-François Sigrist, 2020-01-08 Numerical simulation is a technique of major importance in various technical and scientific fields Whilst engineering curricula now include training courses dedicated to it numerical simulation is still not well known in some economic sectors and even less so among the general public Simulation involves the mathematical modeling of the real world coupled with the computing power offered by modern technology Designed to perform virtual experiments digital simulation can be considered as an art of prediction Embellished with a rich iconography and based on the testimony of researchers and engineers this book shines a light on this little known art It is the second of two volumes and gives examples of the uses of numerical simulation in various scientific and technical fields agriculture industry Earth and universe sciences meteorology

Encyclopedia of Science and Technology Communication Susanna Hornig Priest, 2010-07-14 In the academic world the term science communication refers both to a set of professions such as science journalism and public information work and to an interdisciplinary scholarly research specialization Much of this research is aimed at improving our understanding of the best ways to communicate complex information especially to people who are not scientists Science communication specialists are concerned with giving people useful information about health environment and technology as well as science itself In order to do this we also need to improve our understanding of how people think form opinions and process information Additionally professional practitioners in science communication are engaged in strategic and ethical decisions every day such as How should reporters cover the issue of climate change Should the views of scientists who do not believe that climate change has been caused by human activity be included alongside the views of those who do in order to give a balanced story or does this mislead the public into thinking that both of these positions are equally accepted within the scientific community The Encyclopedia of Science and Technology Communication provides information on the entire range of interrelated issues in this interdisciplinary field in one place along with clear suggestions on where to begin the search for more Geared towards undergraduate and graduate students in journalism communication mass communication and media

David Albert Jones,2004-12-01 We are delighted to announce that this book has been short listed for the prestigious Michael Ramsey prize for the best in theological writing For more information please visit www.michaelramseyprize.org.uk A radical examination of the Christian tradition relating to the human embryo and how this relates to the debate today In recent years the moral status of the human embryo has come to the fore as a vital issue for a range of contemporary ethical debates concerning the over production freezing and discarding of embryos in IVF concerning the use of spare embryos for scientific experimentation and finally concerning the prospect of producing clone embryos These debates have involved not only general philosophical arguments but also specifically religious arguments Many participants have attempted to find precedent from the Christian tradition for the positions they wish to defend It is therefore extraordinary that until *The Soul of the Embryo* there has been no significant work on the history of Christian reflection on the human embryo Here David Albert Jones seeks to tell the story of this unfolding tradition a story that encompasses many different medical moral philosophical and theological themes He starts by examining the understanding of the embryo in the Hebrew Scriptures then moves through early Christianity and the Middle Ages to the Reformation and beyond Finally Albert Jones considers the application of this developed tradition to contemporary situation and questions which contemporary Christian view or views are best regarded as authentic developments of the tradition and which should be regarded as alien to the tradition *The Perennial Satirist* Peter Edgerly Firchow,Hermann Josef Real,2005 This collection of essays primarily honours Bernfried Nugel the teacher and scholar but it also pays homage to Bernfried Nugel the indefatigable worker in the cause of Aldous Huxley studies It is due to this latter manifestation that many of the contributors to this volume know each other personally having met at one or more of the international conferences that Professor Nugel organized and either hosted or co hosted At Munster his home university he has also been instrumental in establishing and heading a center for admirers of Huxley s work along with a fine library of Huxley materials including manuscripts and numerous first editions Series Human Potentialities Studien zu Aldous Huxley zeitgenossischer Kultur Studies in Aldous Huxley Contemporary Culture Vol 7

Beyond Critique Pamela Fraser,Roger Rothman,2017-04-06 Critique has long been a central concept within art practice and theory Since the emergence of Conceptual Art artists have been expected by critics curators and art school faculty to

focus their work on exposing and debunking ideologies of power and domination Recently however the effectiveness of cultural critique has come into question The appearance of concepts such as the speculative the reparative and the constructive suggests an emerging postcritical paradigm Beyond Critique takes stock of the current discourse around this issue With some calling for a renewed criticality and others rejecting the model entirely the book's contributors explore a variety of new and recently reclaimed criteria for contemporary art and its pedagogy Some propose turning toward affect and affirmation others seek to reclaim such allegedly discredited concepts as intimacy tenderness and spirituality With contributions from artists critics curators and historians this book provides new ways of thinking about the historical role of critique while also exploring a wide range of alternative methods and aspirations Beyond Critique will be a crucial tool for students and instructors who are seeking to think and work beyond the critical

Science Fiction as Legal Imaginary

Alex Green, Mitchell Travis, Kieran Tranter, 2024-11-21 This book examines how science fiction informs the legal imagination of technological futures Science fiction the contributors to this book argue is a storehouse of images tropes concepts and memes that inform the legal imagination of the future and in doing so generate impetus for change Specifically the contributors examine how science fictions imagine human life in space in the digital and as formed and negotiated by corporations They then connect this imaginary to how law should be understood in the present and changed for the future Across the chapters there is an urgent sense of the need for law as it is has been and as it might become to order and safeguard the future for a multiplicity of vulnerable entities This book will appeal to scholars and students with interests in law and technology legal theory cultural legal studies and law and the humanities
