No Mammo? Rachel Campergue, 2025-07-23

Every year the month of October is decked out in pink with countless posters calling on people to crusade against breast cancer through mammography

Why are public health officials doctors associations and laboratories so keen to do this

Are women really well informed about the risks they run by undergoing screening

And do the promised benefits really exist

Rachel Campergue was outraged by gynecologists obstinacy in forcing her to undergo mammography

What she discovered was appalling

By infantilizing women public authorities promote confusion between prevention and screening

Doctors do not have adequate knowledge to ensure that the consents they obtain from their patients are indeed informed

As for the associations they are the agents of a juicy business that benefits above all the manufacturers of health products

The conclusion of this abundant precise and humorous work is without appeal

a cancer detected by mammography does not equal a life saved and if you choose to have one every two years do so with full knowledge of the facts
