

Determine the child's facial characteristics by having each parent flip a coin.

Heads = child will inherit the first allele (i.e. B or N1) in a pair

Tails = child will inherit the second allele (i.e. b or N2) in a pair

On the data sheet, circle the allele that the parent will pass on to the child and write the child's genotype.

Using the information in this guide, look up and record the child's phenotype and draw that section of the face where indicated on the data sheet. Some traits follow special conditions, which are explained in the guide. When the data sheet is completed, draw your child's portrait as he/she would look as a teenager. You must include the traits as determined by the coin tossing. Write your child's full name on the portrait.

Infants and Children Laura E. Berk, 2022-07-26 In the Ninth Edition of *Infants and Children Prenatal Through Middle Childhood* renowned professor researcher and author Laura E Berk takes an integrated approach to presenting development in the physical cognitive emotional and social domains emphasizing the complex interchanges between heredity and environment providing exceptional multicultural and cross cultural focus and offering research based practical applications that students can relate to their personal and professional lives **Disclosure Dilemmas** Hansjakob Müller, 2017-03-02

There exists today a fast growing availability of personal genetic information Its prognostic impact and value for an individual or family member s health is sometimes unclear whilst at other times it is clear cut The issue of whether to disclose genetic information does however have wide ranging implications Avoiding the rhetoric of genetic exceptionalism and drawing on an expanded field of bioethical sociological and anthropological research this book sets a new agenda for discussing the ethics surrounding the disclosure of prognostic genetic information A hermeneutical approach reconsiders the ethics of disclosure in a variety of contexts in which genetic information is generated requested interpreted or communicated from the provider perspective but also from the moral perspectives of clients and their families It is in situations of disclosure in these different contexts that genetic information meets morality Providers and recipients can become vulnerable to the revelation or concealment of information and the forms in which it may be provided Disclosure Dilemmas invites readers to explore these contexts from an ethical viewpoint and will be a valuable resource for anyone with an interest in biomedical ethics *The*
