Learning to Teach Design and Technology in the Secondary School Gwyneth Owen-Jackson, 2015-05-15 Learning to Teach Design and Technology in the Secondary School is established as a core text for all those training to teach Design and Technology in the secondary school. It helps you develop subject knowledge, acquire a deeper understanding of the role, purpose and potential of Design and Technology within the secondary curriculum, and provides the practical skills needed to plan, teach and evaluate stimulating and creative lessons. This third edition has been fully updated in light of the latest curriculum policy and theory, as well as exciting changes in the field of design and technology. Designed to be read as a course or dipped into for support and advice, it covers: Developing areas of subject knowledge; Health and safety; Planning lessons; Organising and managing the classroom; Teaching and learning with digital technologies; Teaching wider issues through design and technology; Assessment issues; Your own professional development; Bringing together insights from current educational theory and the best contemporary classroom teaching and learning. This book will prove an invaluable resource for all student and newly qualified teachers, as well as their mentors who aspire to become effective reflective teachers.

Introduction to Embedded Systems and Robotics Nayan M. Kakoty, Rupam Goswami, Ramana Vinjamuri, 2024-12-12 This book is a technical guide to fundamentals of embedded systems and robotics and their application to practical problems. The book hosts the concepts of different elements related to the amalgamation of embedded system and robotics before tackling the physics of robotic systems. This book is the ABC of embedded system and robotics: A for acquiring the concepts, B for building robotic systems, and C for creating solutions. It is appropriate for undergraduate and post graduate students of electronics and electrical engineering, robotics engineering, computer science and engineering, mechanical engineering, and allied disciplines. Specifically, it will act as a guide for students doing robotics projects in their final semesters.
